GENERAL DESCRIPTION

The Servo 201a is a compact power amplifier that provides excellent reliability and versatility. Ideal for powering near field monitors or installation sound, the Servo 201a offers 100 watts per side at 4 ohms in stereo or 200 watts at 8 ohms in bridged mono.

With its bipolar design and toroidal transformer power supply, the Servo 201a provides quiet, dependable performance, and its 10-segment, 3-color LED meters also add a convenient visual element. The Servo 201a is an ideal solution for near field monitors or cue headphones in both professional and project studios. Its superb audio specs along with a unique front-panel speaker on-off switch and dedicated headphone jack make the Servo 201a a great complement to any recording studio.

In addition to studio applications, this compact, unobtrusive power amplifier is great for home theater applications in conjunction with any DVD player or other surround sound system. For example, use it in stereo mode to drive your main front left/right speakers, using your home stereo to drive the rear satellite speakers. Or use the Servo 201a in bridge mode to drive your center channel or subwoofer.

Of course, the Servo 201a is also great for powering public address systems in permanent installations like

classrooms and corporate conference rooms. Additionally, the unit is ideal for driving stage monitors in small and medium-sized onstage areas such as clubs and lounges, allowing the performers to hear themselves without having to rely on onstage equipment amplification.

Taking only a single rackspace, installers can easily incorporate the Servo 201a into their existing rack. Combined with a pair of high-quality stage or studio speakers, this amplifier makes for an excellent monitoring system that can accurately reproduce the broad range of frequencies typically output by devices such as synthesizers, samplers, and digital audio workstations.
