

A photograph of a stone cairn on a beach at sunset. The sky is a mix of blue and orange, with the sun low on the horizon. The water is calm, reflecting the sky. The stone cairn is made of dark, stacked stones and is the central focus of the image.

Towards Constructive Change In Aboriginal Communities A Social Psychology Perspective:

Towards Constructive Change in Aboriginal Communities Donald M. Taylor, 2014-10-01 The widespread failure of so many interventions in First Nations and Inuit communities across Canada requires an explanation Applying the theoretical and methodological rigour of experimental social psychology to genuine community based constructive change Donald Taylor and Roxane de la Sablonniere outline new ways of addressing the challenges that Aboriginal leaders are vocalizing publicly To date the decolonization process in Canada has led to programs that focus on the struggling individual However colonization was and still is a collective process and thus requires collective solutions Rooted in years of research teaching and experience in First Nations and Inuit communities the authors offer necessary solutions They contend that survey research can be uniquely applied as a means to initiate constructive community change demonstrating how their intervention process uses such research to foster positive social norms by feeding the results back to the community Ultimately Towards Constructive Change in Aboriginal Communities outlines how field research can be used to give a voice to First Nations and Inuit community members and serve as a platform for constructive social change

Understanding Peace and Conflict Through Social Identity Theory Shelley McKeown, Reeshma Haji, Neil Ferguson, 2016-06-17 This volume brings together perspectives on social identity and peace psychology to explore the role that categorization plays in both conflict and peace building To do so it draws leading scholars from across the world in a comprehensive exploration of social identity theory and its application to some of the world's most pressing problems such as intrastate conflict uprising in the middle east the refugee crisis global warming racism and peace building A crucial theme of the volume is that social identity theory affects all of us no matter whether we are currently in a state of conflict or one further along in the peace process The volume is organized into two sections Section 1 focuses on the development of social identity theory Grounded in the pioneering work of Dr Henri Tajfel section 1 provides the reader with a historical background of the theory as well as its current developments Then section 2 brings together a series of country case studies focusing on issues of identity across five continents This section enables cross cultural comparisons in terms of methodology and findings and encourages the reader to identify general applications of identity to the understanding of peace as well as applications that may be more relevant in specific contexts Taken together these two sections provide a

contemporary and diverse account of the state of social identity research in conflict situations and peace psychology today It is evident that any account of peace requires an intricate understanding of identity both as a cause and consequence of conflict as well as a potential resource to be harnessed in the promotion and maintenance of peace Understanding Peace and Conflict Through Social Identity Theory Contemporary Global Perspectives aims to help achieve such an understanding and as such is a valuable resource to those studying peace and conflict psychologists sociologists anthropologists public policy makers and all those interested in the ways in which social identity impacts our world The Psychology of Radical Social Change Brady Wagoner, Fathali M. Moghaddam, Jaan Valsiner, 2018-04-03 Since 2011 the world has experienced an explosion of popular uprisings that began in the Middle East and quickly spread to other regions What are the different social psychological conditions for these events to emerge what different trajectories do they take and how are they represented to the public To answer these questions this book applies the latest social psychological theories to contextualized cases of revolutions and uprisings from the eighteenth to the twenty first century in countries around the world In so doing it explores continuities and discontinuities between past and present uprisings and foregrounds such issues as the crowds collective action identity changes globalization radicalization the plasticity of political behaviour and public communication The Social Psychology of Collective Victimhood Johanna Ray Vollhardt, Johanna Vollhardt, 2020 This book examines the social psychological processes involved in experiences of collective victimization and oppression as well as the consequences of these experiences for individuals and for relations within and between groups In twenty chapters authors explore questions such as How are experiences of collective victimization passed down and understood How do people cope with and make sense of these experiences Who is included and excluded from the category of victims and what are the psychological consequences of such denial versus acknowledgment of collective victimization And finally what are the ethics of researching collective victimization especially when these experiences are recent or politically contested **The Social Psychology of Tolerance** Maykel Verkuyten, 2022-11-29 This highly topical book is the first of its kind to provide a comprehensive theoretical and empirical discussion of the social psychology of tolerance exploring the importance and drawbacks of a focus on tolerance and discussing how tolerance can be stimulated in a range of contexts The importance of tolerance for a diverse equal and open society is increasingly recognized by social and behavioural scientists When people are aware of salient differences and disagree about the value of various viewpoints and ways of life the question of tolerance arises Not only in relation to religious cultural ideological and viewpoint differences but also concerning everyday things such as annoying habits of one's partner the views and behaviour of one's children disagreements at work and neighbourhood hassles Verkuyten uses concrete examples to discuss the various reasons for why tolerance is vital for peaceful communities especially in our increasingly diverse and polarized world Providing a thorough examination of the social psychology of tolerance this is a valuable text not only to social psychologists but to a range of students and scholars in
