Tamma,Stephen Cranefield,Timothy W. Finin,Steven Willmott,2006-03-30 There is a growing interest in the use of ontologies for multi agent system app cations On the one hand the agent paradigm is successfully employed in those applications where autonomous loosely coupled heterogeneous and distributed systems need to interoperate in order to achieve a common goal On the other hand ontologies have established themselves as a powerful tool to enable kno edge sharing and a growing number of applications have bene ted from the use of ontologies as a means to achieve semantic interoperability among heterogeneous distributed systems In principle ontologies and agents are a match made in heaven that has failed to happen What makes a simple piece of software an agent is its ability to communicate in a social environment to make autonomous decisions and to be proactive on behalf of its user Communication ultimately depends on und standing the goals preferences and constraints posed by the user Autonomy is theabilitytoperformataskwithlittleornouserintervention whileproactiveness involves acting autonomously with no need for user prompting Communication but also autonomy and proactiveness depend on knowledge The ability to c municate depends on understanding the syntax terms and structure and the semantics of a language Ontologies provide the terms used to describe a domain and the semantics associated with them In addition

ontologies are often complemented by some logical rules that constrain the meaning assigned to the terms. These constraints are represented by inference rules that can be used by agents to perform the reasoning on which autonomy and proactiveness are based.

Paul Messaris is an extremely thoughtful commentator on the world of visuals. He has studied advertising visuals for many years, and his insights are always stimulating and sometimes even controversial. This book makes an important contribution to the literature in two fields: visual communication and advertising. I recommend it for faculty and students, as well as professionals in the advertising field. Sandra Moriarty, Professor, University of Colorado. With an informal writing style and examples both thoughtful and illustrative, Paul Messaris in his *Visual Persuasion* leads the reader through the often complex field of visual literacy related to advertising images with high style and intellect. When so much information is conveyed through quickly edited and carefully controlled mass media images, *Visual Persuasion* is a vital book toward understanding the impact on individuals, cultures, and society of persuasive visual messages. Paul Martin Lester, Ph.D., Author of *Visual Communication with Messages*. A smartly reasoned and elegantly written treatment of visual argumentation, authored by one of America's most respected authorities on visual communication. James Lull. The pictures in TV commercials, magazine ads, and other forms of advertising often convey meanings that cannot be expressed as well or at all through words.

or music Visual Persuasion is an exploration of these unique aspects of advertising By virtue of their ability to simulate the appearance of the physical world pictures can become surrogate objects of desire or other emotions which ads subsequently associate with products By exploiting viewers assumptions of a direct automatic connection between photography and reality images can serve as proof of advertising claims Because of the implicit nature of visual argumentation and the relative lack of social accountability that images enjoy in comparison with words pictures can be used to make advertising claims that would be unacceptable if they were spelled out verbally Using these characteristics of visual persuasion as a starting point this important book analyzes a variety of commercial political and social issue advertisements A separate chapter examines the role of pictures in cross cultural advertising Visual Persuasion is recommended for upper level undergraduate students and graduate students in communication and media studies It also contains insights that will be valuable to students in courses in cultural studies sociology anthropology and advertising Vehicle donations benefits to charities and donors, but limited program oversight. , **Predicasts F & S Index United States** Predicasts, inc,1992 A comprehensive index to company and industry information in business journals
