San Antonio MultiComm Services (SAMS) provides high quality communications networks in the Greater San Antonio area. SAMS offers subscription-based services for digital cable video programming, local and long-distance telephone services and high speed internet access. Recently, SAMS is facing competition from other network providers that have expanded in the San Antonio Area.

SAMS marketing department wants to increase subscriptions for its Three-For-All telephone, cable, and Internet combined services. SAMS marketing has been conducting an aggressive direct-marketing campaign that includes postal and electronic mailings and telephone solicitations. Feedback from these efforts indicates that including premium channels in this combined service is a very important factor for both current and prospective subscribers. After several brainstorming sessions, the marketing department has decided to add premium cable channels as a no-cost benefit of subscribing to the Three-For-All service.

You plan to conduct a survey among prospective customers to determine how many premium channels need to be added to the Three-For-All service in order to generate a subscription to the service. Based on past campaigns and on industry-wide data, you estimate the following.

Number of Free Premium Channels	Probability of Subscriptions
0	0.02
1	0.04
2	0.06
3	0.07
4	0.08
5	0.085

Questions 1, 2 & 3 Hint Distribution: They subscribe or they don't

1. If a sample of 50 prospective customers is selected and no free premium channels are included in the Three-For-All service offer, what is the probability that fewer than 3 customers will subscribe? What is the probability that more than 4 customers will subscribe?
2. Instead of offering no premium free channels, suppose that two free premium channels are included. What is the probability that fewer than 3 customers will subscribe? What is the probability that more than 4 customers will subscribe?
3. Compare your answers from questions #1 and #2 and interpret the meaning of the results.
