analytical companies have begun to realize the value in their vast holdings of customer data and have found ways to leverage this untapped potential. Now more firms are following suit and looking to monetize Big Data for big profits. Such changes will have implications for both businesses and consumers in the coming years.

In *From Big Data to Big Profits*, Russell Walker investigates the use of Big Data to stimulate innovations in operational effectiveness and business growth. Walker examines the nature of Big Data and how businesses can use it to create new monetization opportunities. Using case studies of Apple, Netflix, Google, LinkedIn, Zillow, Amazon, and other leaders in the use of Big Data, Walker explores how digital platforms such as mobile apps and social networks are changing the nature of customer interactions and the way Big Data is created and used by companies. Such changes, as Walker points out, will require careful consideration of legal and unspoken business practices as they affect consumer privacy. Companies looking to develop a Big Data strategy will find great value in the SIGMA framework which he has developed to assess companies for Big Data readiness and provide direction on the steps necessary to get the most from Big Data. Rigorous and meticulous, *From Big Data to Big Profits* is a valuable resource for students, researchers, and professionals with an interest in Big Data, digital platforms, and analytics.

Charging Ahead Joe Sherman, 1998-10-29. Charging Ahead is a classic tale of perseverance against daunting odds in the pursuit of a personal dream and an environmental revolution. You'd have to be a fool to market a consumer electric car, let alone challenge the big three auto makers with a little start up company. But MIT graduate James Worden with his girlfriend and a handful of audacious engineers did both and he's well on his way to success. In this marvelous narrative, business writer Joe Sherman vividly describes how Worden and his team built the world's most advanced EV electric vehicle, the Sunrise. Combining insightful biography with the best of science and business writing, Sherman captures not only Worden's own gripping story but also the technical challenge of designing an electric car in an age of anxiety over the environment. He depicts Worden's fascination with EVs from childhood; he built his award winning first electric car in high school, tracing it through his monomaniacal career at MIT where he organized a student team that built EVs for races worldwide to the founding of Solectria, a company committed to building a consumer electric car. Sherman shows how, despite all the obstacles, Solectria eventually lined up such strategic partners as the Pentagon on its way to producing the Sunrise, a lightweight all composite high tech commuter car. The Sunrise would triumph over rivals from the Big Three in the 7th American Tour de Sol and later travel from Boston to New York on a single battery charge. Charging Ahead is an engaging story of James Worden's struggle to succeed with idealism, energy and technological superiority against seemingly impossible odds.
