Having a more simplified and straightforward text material without compromising on value of content is the main aim of this book. Materials are well selected to make learning and teaching easier for the user of this book. The senior high school student is the main targeted end user of this book. However, it can also serve as a reference material for other levels of learning. The content is based on the Ghanaian and West African syllabus for senior high education. This integrated science textbook has its content organized in sections, units, and academic year. Year 1 content provides foundation tutoring. Year 2 is built on the content of year 1, likewise year 3 has its content built on that of year 2. This approach renders a vertical upward systematic approach to learning that enables the learner to build upon previous knowledge. Reference materials, tables, charts, and units are also provided to assist the learner in doing research or performing experiments. It is our hope that this textbook will satisfy teachers and learners at the senior high level of education in the area of integrated science comprising of basic biology, physics, chemistry, agriculture, and indigenous technology.

In May of 1985, an international symposium was held at The Metropolitan Museum of Art in honor of John M Crawford Jr, whose gifts of Chinese calligraphy and painting have constituted a significant addition to the Museum's holdings. Over a three-day period, senior scholars from China, Japan, Taiwan, Europe, and the United States expressed a wide range of perspectives on an issue central to the history of Chinese visual aesthetics: the relationships between poetry, calligraphy, and painting. The practice of integrating the three art forms, known as *san chieh* or the three perfections in one work of art, emerged during the Sung and Yuan dynasties, largely in the context of literati culture, and it has stimulated lively critical discussion ever since. This publication contains twenty-three essays based on the papers presented at the Crawford symposium. Grouped by subject matter in a roughly chronological order, these essays reflect research on topics spanning two millennia of Chinese history. The result is an interdisciplinary exploration of the complex set of relationships between words and images by art historians, literary historians, and scholars of calligraphy. Their findings provide us with a new level of understanding of this rich and complicated subject and suggest further directions for the study of Chinese art history. The essays are accompanied by 255 illustrations, some of which reproduce works rarely published. Chinese characters have been provided throughout the text for artists' names, terms, titles of works of art, and literature, and important historical figures, as well as for excerpts of selected poetry and prose. A chronology, also containing Chinese characters, and an extensive index contribute to making this book illuminating and invaluable to both the specialist and the layman.
