web apr 6 2012 simple and efficient only one loop example of region growing algorithm from a single seed point the region is iteratively grown by comparing all unallocated neighbouring pixels to the region using mathematical morphology the difference between a pixel s intensity value and the region s mean is used as a measure of similarity

seeded region growing ieee journals magazine ieee xplore - Aug 01 2022

web seeded region growing abstract we present here a new algorithm for segmentation of intensity images which is robust rapid and free of tuning parameters the method however requires the input of a number of seeds either individual pixels or regions which will control the formation of regions into which the image will be segmented

web feb 11 2021 1 answer region growing is a very simple algorithm in short it says if the next pixels is less than `regmaxdist` in pixel value than the current pixel its part of the region otherwise its not your image is very smooth that means that pixel values change slowly in adjacent pixels thus region growing algorithms will take them in
