Tina Ancinec, 2002-04-18 The Mayan Indians of the Yucatan Peninsula through a very complicated process were able to study the sun by monitoring the planet Venus This formed the basis for their complex calendarical system which stretches over thousands of years They discovered the way the sun rotates creates sunspots After twenty sunspot cycles which occurred approximately every thirty seven hundred years the sun s rotational orbit would change causing the Earth to turn on it s axis This is due to occur again on December 22 2012 On this day the world as we know it will end Austin Green a forty year old theoretical physicist and his nineteen year old son Zeo barely escape from Los Angeles before a third massive earthquake cracks the North American plate and the entire west coast sinks into the ocean in a matter of minutes Now in the year is 2011 they re struggling to re build a society in the coastal city of Phoenix Arizona with others who ve survived the precursors to the pole shift a long string of natural disasters that had been plaguing the Earth since 2009 The United States economy has fallen making money worth nothing The barter system is used for everything and horses and bicycles are again common modes of transportation Austin once a well recognized physics professor and researcher at the California Institute of Technology still harbors the slight hope that there will again come a time when our scientific technology will be applied to real life Now while everyone awaits the outcome of the final pole shift he teaches cutting edge physics to a small class of students of various ages the future parents of the root race of humans that will hopefully re build society But Austin is restless He can t believe what has become of the planet and the humans who once ruled it He has to know what the future holds Does the music play forever Will all life on Earth end before the middle of the twenty first century thus destroying everything mankind has ever discovered since the beginning of time as we know it Or have we learned from our past mistakes Will we build a future society more in tune with nature Or will greed cause us to make the same mistakes over

again Combining Austin s expertise in hyperspace manipulation and Zeo s deep seeded new age intuition they devise an elaborate plan utilizing a home made proton accelerator the energy vortexes in Sedona Arizona a quartz crystal and the energy generated on the day of the winter solstice when the sun changes it s rotation to construct a worm hole two hundred years into the future and escape just seconds before the Earth turns on it s axis Does the Music Play Forever is a story of one man s discovery of not only his true nature but also the true nature of the universe and mankind s innate connection to it It is the ultimate example of the law of cause and effect and the interconnectedness of everything in the universe
