

Problems

Use the ASA Theorem or the AAS Theorem for appropriate triangles to prove the triangles congruent.

1. Because \angle M and \angle N are right angles, they are congruent. \overline{MT} is \overline{NT} by the Reflexive Property of \cong , and it is given that \angle M is \angle N. Therefore, $\triangle MTN \cong \triangle NTN$ by the ASA Theorem.

2. It is given that $\overline{RT} = \overline{ST}$ and \angle R is \angle S. Because \angle CRT and \angle STS are vertical angles, they are congruent. Therefore, $\triangle CRT \cong \triangle STS$ by the ASA Theorem.

Problems

Write congruence statements.

- Copy the first figure on the right. Mark the figure with the angle congruences and side congruences appropriate that you would need to prove the triangles congruent by the ASA Theorem.
- Copy the second figure shown. Mark the figure with the angle congruences and side congruences appropriate that you would need to prove the triangles congruent by the ASA Theorem.
- Draw and mark two triangles that are congruent by either the ASA Theorem or the AAS Theorem. (Check students' work.)

What additional information would you need to prove each pair of triangles congruent by the stated postulate or theorem?

4. ASA Theorem
 \angle ABC is \angle DEF

5. AAS Theorem
 \angle ABC is \angle DEF and
 \angle ACB is \angle FED

6. ASA Theorem
 \angle ABC is \angle DEF

7. AAS Theorem

Wallis,2013-03-14 This text is a basic introduction to those areas of discrete mathematics used by students of mathematics and computer science Introductory courses on this material are now standard at many colleges and universities Usually these courses are of one semester's duration and usually they are offered at the sophomore level Very often this will be the first course where the students see several real proofs The preparation of the students is very mixed and one cannot assume a strong background In particular the instructor should not assume that the students have seen a linear algebra course or any introduction to number systems that goes beyond college algebra In view of this I have tried to avoid too much sophistication while still retaining rigor I hope I have included enough problems so that the student can reinforce the concepts Most of the problems are quite easy with just a few difficult exercises scattered through the text If the class is weak a small number of sections will be too hard while the instructor who has a strong class will need to include some supplementary material I think this is preferable to a book at a higher mathematical level which will scare away weaker students **The Art and Science of Mental Health Nursing: Principles and Practice** Ian Norman,Iain Ryrie,2018-05-23 Interested in purchasing The Art and Science of Mental Health Nursing as a SmartBook Visit <https://connect2.mheducation.com/join/cnormanryrie4e> to register for access today This well established textbook is a must buy for all mental health nursing students and nurses in registered practice Comprehensive and broad it explores how mental health nursing has a positive impact on the lives of people with mental health difficulties Several features help you get the most out of each chapter and apply theory to practice including Personal Stories Provide insight into the experience of mental health difficulties from the perspective of service users and their carers Thinking Spaces Help you reflect on your practice and assess your learning individually and in groups with further guidance available online Recommended Resources Provide additional materials and support to help extend your learning New to this edition With four brand new chapters plus nine chapters re-written by original authors key developments in this edition include Physical health care of people with mental health problems Care of people who experience trauma Promoting mental health and well being Support needed by nurses to provide therapeutic care and to derive satisfaction from their work Innovations in mental health practice The newly revised and updated edition has continued to offer an intelligent and readable text that offers a great deal to both students and those undertaking continuous professional development This edition continues to offer thinking spaces that encourage the reader to reflect upon and consider what they have learned in a most practical way I wholeheartedly recommend this book and continue to be impressed with its high standards of presentation and scholarship Emeritus Professor Tony Butterworth CBE Chair Foundation of Nursing Studies Vice Chair RCN Foundation UK It is a pleasure to open this book and to see the comprehensive range of information and evidence based guidance in relation to effective practice in nursing Even If you only buy one professional book this year make it this one Baroness Watkins of Tavistock Crossbench Peer
