## **Rethinking Order Idioms Of Stability And De Stabilization Culture Theory:**

**Rethinking Order** Nicole Falkenhayner, Andreas Langenohl, Johannes Scheu, Doris Schweitzer, Kacper Szulecki, 2015-11-15 Stability is at the core of every discussion of order organization or institutionalization From an inside perspective the stability of each order constituting element is assumed In contrast in critical discourses instability e g through ambiguity or non control is located at the outside of the social order as its negative By treating this argumentative symmetrical structure as idioms of stability and destabilization the articles try to rethink order How can we describe structures from a perspective in which instability non control and irrationality are not contrary to ordering systems but contribute to their stability How might the notions of identity knowledge and institutions in social and cultural studies be contested by this change of perspective Dissidents in Communist Central Europe Kacper Szulecki, 2019-09-03 This monograph traces the history of the dissident as a transnational phenomenon exploring Soviet dissidents in Communist Central Europe from the mid 1960s until 1989 It argues that our understanding of the transnational activist would not be what it is today without the input of Central European oppositionists and ties the term to the global emergence and evolution of human rights The book examines how we define dissidents and explores the association of political resistance to authoritarian regimes as well as the impact of domestic and international recognition of the dissident figure Turning to literature to analyse the meaning and impact of the dissident label the book also incorporates interviews and primary accounts from former activists Combining a unique theoretical approach with new empirical material this book will appeal to students and scholars of contemporary history politics and culture in Central Europe **Affect in Relation** Birgitt Röttger-Rössler, Jan Slaby, 2018-05-11 Decades of research on affect and emotion have brought out the paramount importance of affective processes for human lives Affect in Relation brings together perspectives from social science and cultural studies to analyze the formative subject constituting potentials of affect and emotion Relational affect is understood not as individual mental states but as social relational processes that are both formative and transformative of human subjects This volume explores relational affect through a combination of interdisciplinary case studies within four key contexts Part I Affective Families deals with the affective dynamics in transnational families who are scattered across several regions and nations Part II Affect and Place brings together work on affective place making in the contexts of migration and in political movements Part III Affect at Work analyzes the affective dimension of contemporary white collar workplaces Part IV Affect and Media focuses on the role of media in the formation and mobilization of relational affect In its transdisciplinary spirit analytical rigor and focus on timely and salient global matters Affect in Relation consolidates the field of affect studies and opens up new avenues for scholarly and practical co operation It will appeal to both students and postdoctoral researchers interested in fields such as anthropology sociology cultural studies media studies and human development

**Media, Surveillance and Affect** Nicole Falkenhayner, 2018-12-07 Surveillance has become a part of everyday life we

are surrounded by surveillance technologies in news media when we go down the street in the movies and even carry them in our own pockets in the form of smartphones How are we constructing imaginaries of our realities and of ourselves as living in structures of control What affects emotions and feelings do we develop in societies of control and how do we narrate them Media Surveillance and Affect represents a big step in revealing the depth of the entanglement of surveillance technology not only with our everyday lives but with our imaginaries and affective experiences Combining insights from affect studies with narratological and visual cultural studies approaches the case studies in this book focus on how surveillance cameras and surveillance camera images have been used to narrate affective stories of Great Britain Cases discussed include the memory work surrounding the murder of James Bulger in 1993 and of Lee Rigby in 2011 but also novels and artworks With a multidisciplinary approach Media Surveillance and Affect will appeal to students scholars and specialists interested in fields such as media and cultural studies literary studies cultural sociology and surveillance studies

**Rethinking Culture** David White, 2017-03-31 Organizational or corporate culture is the most overused and least understood word in business if not society While the topic has been an object of keen academic interest for nearly half a century theorists and practitioners still struggle with the most basic questions What is organizational culture Can it be measured Is it a dependent or independent variable Is it causal in organizational performance and if so how Paradoxically managers and practitioners ascribe cultural explanations for much of what constitutes organizational behavior in organizations and moreover believe culture can be engineered to their own designs for positive business outcomes What explains this divide between research and practice While much academic research on culture is challenged by ontological epistemic and ethical difficulties there is little empirical evidence to show culture can be deliberately shaped beyond espoused values The gap between research and practice can be explained by one simple reason the science and practice of culture has yet to catch up to managerial intuition Managers are correct in suspecting culture is a powerful normative force but until now current theory and research is not able to adequately account for cultural behavior in organizations Rethinking Culture describes and presents evidence for a new framework of organizational culture based on the cognitive science of the so called cultural mind It will be of relevance to academics and researchers with an interest in business and management organizational culture and organizational change as well as cognitive and cultural anthropologists and sociologists interested in applications of theory in organizational and institutional settings
