

Hydrocarbons - Review

- * A hydrocarbon is a compound which contains only hydrogen and carbon
- * Hydrocarbons can be classified as **saturated** or **unsaturated**
- * **Saturated** hydrocarbons have only single bonds between the carbons; we can think of them as being “saturated” with as many hydrogen atoms as possible can bond to the carbons
- * **Unsaturated** hydrocarbons contain one or more multiple bonds between the carbons; since carbon can only make four bonds when it contains a multiple bond it can bond with fewer hydrogen atoms

Reviews of Environmental Contamination and Toxicology David M. Whitacre, 2014-11-10 *Reviews of Environmental Contamination and Toxicology* attempts to provide concise critical reviews of timely advances philosophy and significant areas of accomplished or needed endeavor in the total field of xenobiotics in any segment of the environment as well as toxicological implications Materials For Sustainable Energy: A Collection Of Peer-reviewed Research And Review Articles From Nature Publishing Group Vincent Dusastre, 2010-10-05 The search for cleaner cheaper smaller and more efficient energy technologies has to a large extent been motivated by the development of new materials The aim of this collection of articles is therefore to focus on what materials based solutions can offer and show how the rational design and improvement of their physical and chemical properties can lead to energy production alternatives that have the potential to compete with existing technologies In terms of alternative means to generate electricity that utilize renewable energy sources the most dramatic breakthroughs for both mobile i e transportation and stationary applications are taking place in the fields of solar and fuel cells And from an energy storage perspective exciting developments can be seen emerging from the fields of rechargeable batteries and hydrogen storage **OECD Environmental Performance Reviews: Costa Rica 2023**
