Griffiths, Jin Ling Tang, Eng Kiong Yeoh, 2014-04-16

Global public health is of growing concern to most governments and populations nowhere more so than in Asia the world's largest and most populous continent Whilst major advances have been made in controlling infectious diseases through public health measures as well as clinical medical treatments the world now faces other challenges including ageing populations and the epidemic crisis of obesity and non communicable diseases New emerging infections continue to develop and the

growing threats to health due to environmental pollution and climate change increase the need for resilience and sustainability. These threats to health are global in nature and this Handbook will explore perspectives on current public health issues in South Southeast and East Asia informing global as well as regional debate. Whilst many books cite Western examples of the development of global public health, this Handbook brings together both Western and Eastern scholarship creating a new global public health perspective suitable to face modern challenges in promoting the population's health. This Handbook is essential reading not only for students, professionals and scholars of global public health and related fields but is also written to be accessible to those with a general interest in the health of Asia.

Routledge Handbook of Families in Asia Stella R. Quah, 2015-03-24. Research on the family has expanded considerably across Asia but studies tend to be fragmented, focusing on narrow issues within limited areas: cities, towns, small communities, and may not be accessible to international readers. These limitations make it difficult for researchers, students, policy makers and practitioners to obtain the information they need. The Routledge Handbook of Families in Asia fills that gap by providing a current and comprehensive analysis of Asian families by a wide range of experts in a single publication. The thirty-two chapters of this comparative and multi-disciplinary volume are organized into nine major themes: conceptual approaches, methodological issues, family life in the context of culture, family relationships across the family life cycle, issues of work and income, stress and conflict, family diversity, family policy and laws, and environmental setting of homes. Each chapter examines family life across Asian countries, studying cultural similarities and differences and exploring how families are changing and what trends are likely to develop in the future. To provide a fruitful learning experience for the reader, each chapter offers examples, relevant data and a comprehensive list of references. Offering a complete interdisciplinary overview of families in Asia, the Handbook will be of interest to students, academics, policy makers and practitioners across the disciplines of Asian Studies, Sociology, Demography,
