amerikanske tyske britiske japanske og italienske flåder **The Royal Navy 1790-1970** Robert Wilkinson-Latham, 1977-06-15 Of all the world's seaborne military organizations the British Royal Navy is perhaps the most prestigious Protector of the British Empire and defender of British freedom it has provided the template on which nearly all other national navies have modelled themselves This book explores the changes in the uniforms of the Royal Navy from the 18th Century to 1970 It includes details from the dress regulations as laid down in the first official illustrated text on the topic which dated from 1825 up through the present day and addresses all variations for climate rank and equipment requirements *The Royal Navy's Air Service in the Great War* David Hobbs, 2017-09-30 In a few short years after 1914 the Royal Navy practically invented naval air warfare not only producing the first effective aircraft carriers but also pioneering most of the techniques and tactics that made naval air power a reality By 1918 the RN was so far ahead of other navies that a US Navy observer sent to study the British use of aircraft at sea concluded that any discussion of the subject must first consider their methods Indeed by the time the war ended the RN was training for a carrier borne attack by torpedo bombers on the German fleet in its bases over two decades before the first successful employment of this tactic against the Italians at Taranto Following two previously well received histories of British naval aviation David Hobbs here turns his attention to the operational and technical achievements of the Royal Naval Air Service both at sea and ashore from 1914 to 1918 Detailed explanations of operations the technology that underpinned them and the people who carried them out bring into sharp focus a revolutionary period of development that changed naval warfare forever Controversially the RNAS was subsumed into the newly created Royal Air Force in 1918 so as the centenary of its extinction approaches this book is a timely reminder of its true significance *Royal Navy List*, 1910 *Service Uniforms for Officers of the Royal Navy* Tailor & Cutter, Ltd., London, 1952\* *Technical Manual*, 1943 **YOUNG JAMES BONDSMAN** PATRICK M. GISLER, 2024-05-01 In Young James Bondsman Patrick Gisler weaves mystery espionage and legacy The story follows James Bondsman an experienced spy after MI 6 headquarters explodes Bondsman recovers in the hospital unaware of the attack that nearly killed him James becomes caught in a web of government surveillance and covert goals while trying to understand his past and Eve Moneyhoney's cryptic notes Carolyn Eve's daughter reveals shocking connections that link their fates forcing James to face his past The Young James Bondsman characters struggle with self discovery survival and the strength of their relationships Kirkwall's wartime exploits and London's shady dealings drive the story Gisler's book about secrets and redemption is a compelling mix of action and emotion **Brevertton's Nautical Curiosities** Terry Brevertton, 2013-11-05 Brevertton's Nautical Curiosities is about ships people and the sea However unlike many other nautical compendiums the focus of this book is on the unusual the overlooked or the downright extraordinary Thus someone most of us do not know Admiral William Brown is given equal coverage to Admiral Nelson Without Admiral Brown releasing Garibaldi modern Italy might not exist And without the barely known genius John Ericsson designing the Monitor the Confederacy might have won the American

Civil War Readers will be stimulated to read more about the remarkable men explorers admirals and trawlermen who have shaped our world The sea has had a remarkable effect upon our language We hear the terms steer clear hit the deck don't rock the boat to harbor a grudge and the like and give little thought to them In the pages of this book the reader will find the origin of bumpkin a brace of shakes born with a silver spoon booby prize to take on board above board bombed in the sense of being drunk the blues blind side blind drunk the pot calling the kettle black reach the bitter end wasters ahoy all at sea to keep aloof piss artist taken aback barbecue and bamboozle Other colourful terms which have passed out of common usage such as bring one's arse to anchor sit down belly timber food and bog orange potato are also included as well as important pirate haunts technical terms famous battles maritime inventors and ship speed records

Re-living Britain in the 1940s Robin Wichard,2023-01-24 The 1940s remains an iconic period in world history and retains a fascination for so many Re-enacting the 40s is becoming increasingly popular but there is little available information explaining how to start in the hobby This book is the first to offer enthusiasts of the 40s a way to advance their interest whether it be military or civilian Each chapter deals with a different aspect of re-enacting from civilian roles including children to military roles with many different potential impressions explored for each area Each chapter is lavishly illustrated with many previously unseen color photographs of contemporary re-enactors and events There are further chapters introducing those people who portray wartime political and military leaders as well as those who bring back to life some of the most iconic musicians and performers of the period For those choosing to enter the hobby through ownership of a civilian or military vehicle that is also covered with many examples of some of the most well known vehicles Each chapter offers a brief contextual history with detailed notes on where to obtain uniform and equipment some of the best groups to join as well as links to related sites and recommendations for wider reading No book can cover every single possible role but this offers an excellent starting point for further research and involvement while stressing the need to always remain respectful of those we seek to commemorate

Studies in Archaeological Conservation Chris Caple,Vicky Garlick,2020-12-14 Studies in Archaeological Conservation features a range of case studies that explore the techniques and approaches used in current conservation practice around the world and taken together provide a picture of present practice in some of the world leading museums and heritage organisations Archaeological excavations produce thousands of corroded and degraded fragments of metal ceramic and organic material that are transformed by archaeological conservators into the beautiful and informative objects that fill the cases of museums The knowledge and expertise required to undertake this transformation is demonstrated within this book in a series of 26 fascinating case studies in archaeological conservation and artefact investigation undertaken in laboratories around the world These case studies are contextualised by a detailed introductory chapter which explores the challenges presented by researching and conserving archaeological artefacts and details how the case studies illustrate the current state of the subject Studies in Archaeological Conservation is the first book for over a quarter of a century to show the range
