Royal Economic Society Essay Competition 2012:

Labor Supply and Taxation Richard Blundell, 2016 Presents Richard Blundell's outstanding research on the modern economic analysis of labour markets and public policy reforms and brings together in revised and integrated form a number of the author's key papers *The Theory of International Business* Mark Casson, 2016-09-22 Demonstrating why economic modelling is so important in understanding international business this stimulating and highly original book sets out a new and exciting research agenda in international business studies The author explains what economic models are how they are constructed and the way in which they can be used It illustrates how models clarify important issues in international business explaining empirical anomalies analyzing strategies and evaluating government policies towards multinational firms There are detailed discussions of monopoly and competition in the global economy the international division of labour supply chain coordination and the strategic implications of sunk costs in R D Based on this discussion the book proposes a radical reformulation of the theory of the firm as applied to international business **Demand for Labor** Daniel S. Hamermesh, 2017 The book collects articles published by Daniel Hamermesh between 1969 and 2013 dealing with the general topic of the demand for labor The first section presents empirical studies of basic issues in labor demand including the extent to which different types of labor are substitutes how firms and workers investments affect labor turnover and how costs of adjusting employment affect the dynamics of employment and patterns of labor turnover The second section examines the impacts of various labor market policies including minimum wages penalty pay for using overtime hours or hours worked on weekends or nights severance pay for displaced workers and payroll taxes to finance unemployment insurance benefits The final section deals with general questions of discrimination by employers along various dimensions including looks gender and ethnicity in all cases focusing on the process of discrimination and the behavior that results Throughout the focus is on the development of theoretically based hypotheses and testing them using the most appropriate data often data collected uniquely for the particular project *Secular Stagnation Theories* Christina Anselmann, 2020-04-17 In light of weak economic performances and rising income disparities across the developed world during the past decades this book provides a comprehensive overview of secular stagnation theories in the history of economic thought and examines the role of income distribution in various stagnation hypotheses By offering a historical perspective from the classical economists to the most recent stagnation debate of the early twenty first century the author shows that most stagnation theories were developed in periods of high and or rising income disparities Eventually it was Josef Steindl one of the least recognized stagnationists in the history of economic thought who put the distribution of income at the heart of his stagnation theory While Josef Steindl focused on the nexus between the functional distribution of income and economic growth this book includes the personal distribution of income in a Kaleckian Steindlian model of economic growth and stagnation In the model presented the nexus between economic growth and the distribution of income is a priori uncertain depending on the type of

economic shock and the specific economic circumstances The author also discusses various empirically oriented policy implications aimed at fostering both economic growth and a more equal distribution of income This book appeals to scholars in economics and the history of economic thought interested in economic growth secular stagnation and income distribution

Manual of Political Economy Vilfredo Pareto, 2014-05-01 Vilfredo Pareto's *Manual of Political Economy* is a classic study in the history of economic thought for many reasons the most noteworthy of which include the setting of general equilibrium economics within a choice theoretic framework based on the opposition between tastes and obstacles the definitive formulation of economic efficiency including the surplus approach to collective welfare the technically flawed but nonetheless insightful treatment of path dependence in consumer theory and the introduction of non competitive market analysis to the general equilibrium economics In so doing Pareto's general study of economic equilibrium not only substantially extended the contributions to economic theory made by Léon Walras his predecessor in the Chair of Political Economy at the University of Lausanne it did so in a manner that was often contrary to Walras's own thinking on the formalisation of economic theory This English language critical edition of Pareto's *Manual of Political Economy* a revised and extended translation of the *Edizione critica* published in Italian in 2006 is a very significant book for two main reasons First it is the only variorum translation of the Italian language *Manuale di Economia Politica* originally published in 1906 and the subsequent French language *Manuel d'économie Politique* originally published in 1909 Second it includes extensive contributions from the editors including annotations to clarify particular points in Pareto's text editors notes to critically reflect on major themes in Pareto's text and to draw attention to the historical influences that led to their development and their anticipation of or influence on subsequent ideas that emerged in economics and notes to the 1909 mathematical appendix to highlight the mix of insight and imperfection in Pareto's mathematical economics

Neo-Marxism and Post-Keynesian Economics Ludo Cuyvers, 2022-06-08 Piero Sraffa and Joan Robinson both iconic Cambridge economists were highly influenced by the economic theory of Karl Marx and integrated important elements of Marx's economic system into their theories This book argues based on published and unpublished documents that the work of Sraffa and Robinson can in fact be considered as essentially post Keynesian neo Marxist The first part of the book reviews the intellectual development of several key thinkers to this neo Marxist current in economic thought Kalecki Steindl Baran and Sweezy Part One and Part Two separately examine Robinson and Sraffa's works and questions how they fit into this specific neo Marxist current either building on it in Robinson's case or following another direction in Sraffa's case Part Three observes Robinson's theory of economic growth and its relationship to the views of Marx and Kalecki Overall Cuyvers demonstrates how their thought processes share characteristics with neo Marxist key ideological ideas such as stating or implying the labour theory of value as either redundant or wrong emphasising the role of class struggle in the distribution of income and rejecting Marx's falling rate of profits Following on from ideas briefly introduced in Cuyvers's *Economic Ideas of Marx's Capital* 2017 this

book will particularly appeal to readers interested in the history of economic thought the work of Sraffa Robinson and Marx post Keynesian economics and neo Marxism The Theory of Value and Distribution in Economics Pierangelo Garegnani, 2012 This new volume explores two alternative economic theories the classical theory and the marginalist or neoclassical theory through a discussion between two eminent economists Pierangelo Garegnani and Paul Samuelson The key themes of the volume are the difference in approaches to the explanation of the distribution of income and relative prices and therefore different approaches to all other economic problems in particular capital accumulation and economic growth The book discusses whether there is a classical approach to the theory of value and distribution at the core of economic theory that is fundamentally different from the later marginalist or neoclassical theory In the volume the late Pierangelo Garegnani argues for the validity of Piero Sraffa's position on this issue whilst the late noble laureate Paul Samuelson vehemently contests it At a time of economic crisis the future of the discipline is far from certain and so it is extremely important to bring these debates back into the light by reproducing them together for the first time A comprehensive introduction by Heinz Kurz sets the debate in this context and provides crucial background to the arguments **Oxford Dictionary of National Biography 2005-2008** Lawrence Goldman, 2013-03-07 Who made modern Britain This book drawn from the award winning Oxford Dictionary of National Biography tells the story of our recent past through the lives of those who shaped national life Following on from the Oxford DNB's first supplement volume noteworthy people who died between 2001 and 2004 this new volume offers biographies of more than 850 men and women who left their mark on twentieth and twenty first century Britain and who died in the years 2005 to 2008 Here are the people responsible for major developments in national life from politics the arts business technology and law to military service sport education science and medicine Many are closely connected to specific periods in Britain's recent history From the 1950s the young Harold Pinter or the Yorkshire cricketer Fred Trueman for example From the Sixties the footballer George Best photographer Patrick Lichfield and the Pink Floyd musician Syd Barrett It's hard to look back to the 1970s without thinking of Edward Heath and James Callaghan who led the country for seven years in that turbulent decade or similarly Freddie Laker pioneer of budget air travel and the comedians Ronnie Barker and Dave Allen who entertained with their sketch shows and sit coms A decade later you probably browsed in Anita Roddick's Body Shop or danced to the music of Factory Records established by the Manchester entrepreneur Tony Wilson In the 1990s you may have hoped that Things can only get better with a New Labour government which included Robin Cook and Mo Mowlam Many in this volume are remembered for lives dedicated to a profession or cause Bill Deedes or Conor Cruise O'Brien in journalism Ned Sherrin in broadcasting or indeed Ted Heath whose political career spanned more than 50 years Others were responsible for discoveries or innovations of lasting legacy and benefit among them the epidemiologist Richard Doll who made the link between smoking and lung cancer Cicely Saunders creator of the hospice movement and Chad Varah founder of the Samaritans With John Profumo who gave his name

to a scandal policeman Malcolm Fewtrell who investigated the Great Train Robbery or the Russian dissident Aleksandr Litvinenko who was killed in London in 2006 we have individuals best known for specific moments in our recent past Others are synonymous with popular objects and experiences evocative of recent decades Mastermind with Magnus Magnusson the PG Tips chimpanzees trained by Molly Badham John DeLorean's gull wing car or the new British Library designed by Colin St John Wilson though as rounded and balanced accounts Oxford DNB biographies also set these events in the wider context of a person's life story Authoritative and accessible the biographies in this volume are written by specialist authors many of them leading figures in their field Here you will find Michael Billington on Harold Pinter Michael Crick on George Best Richard Davenport Hines on Anita Roddick Brenda Hale on Rose Heilbron Roy Hattersley on James Callaghan Simon Heffer on John Profumo Douglas Hurd on Edward Heath Alex Jennings on Paul Scofield Hermione Lee on Pat Kavanagh Geoffrey Wheatcroft on Conor Cruise O'Brien and Peregrine Worsthorne on Bill Deedes Many in this volume are naturally household names But a good number are also remembered for lives away from the headlines What in the 1980s became Thatcherism owed much to behind the scenes advice from Ralph Harris and Alfred Sherman children who learned to read with Ladybird Books must thank their creator Douglas Keen while without its first producer Verity Lambert there would have been no Doctor Who Others are ordinary people capable of remarkable acts Take for instance Arthur Bywater who over two days in 1944 cleared thousands of bombs from a Liverpool munitions factory following an explosion only to do the same months later in another factory Awarded the George Cross and the George Medal Bywater remains the only non combatant to have received Britain's two highest awards for civilian bravery

Fighting Market Failure Maria Cristina Marcuzzo, 2012-03-12

This collection brings together fifteen essays published between 1994 and 2008 which all look into the contribution of a remarkable group of economists known as the Cambridge school or the Cambridge Keynesians The people involved are better defined as a group rather than a school to denote not adhesion to a common body of doctrine but rather the idea of both cohesion and sharing This collection focuses on Keynes Kahn J Robinson and Sraffa who all shared in the physical space and lifestyle of the University of Cambridge The bond between them was intellectual partnership a recognised common ground dialogue and acceptance of criticism Some of the essays in this collection address the content as well as the method and style of the type of economics associated with the Cambridge tradition at the very core of which those economists stand The first section opens with a chapter presenting the group within the physical and metaphorical place which was Cambridge and the remaining five chapters centre on the life and work of each economist The second section has papers looking at them in pairs as it were and revolves around the theme of their collaboration in various intellectual achievements In particular the opening piece makes the rather bold point that the road to the General Theory was not a solitary path In other two papers much is said of Sraffa's intellectual isolation in Cambridge and the difficulty of communication with Joan Robinson The chapters in the third section take up aspects of their theories and approaches which justify the importance and relevance of

the Cambridge tradition in economics This book should be of interest to students and researchers within the history of economics and economic thought particularly those focussing on the Cambridge or Keynesian traditions

The Economics of Small Firms Peter Johnson, 2012-08-21 Student friendly and international in scope and relevance this book provides an accessible introduction to the economics of small business for those with little knowledge of economics Economics alongside other disciplines and interacting with them has some important insights to offer and it is in this context that The Economics of Small Firms examines the formation survival growth and financing of small businesses spatial variations in business formation the economic role of small businesses and key policy issues This informative text is an essential purchase for anybody studying business and management who is eager for an easy to use and engaging overview of economics entrepreneurship and small business

The Economic Turn Steven Kaplan, Sophus Reinert, 2019-01-16 The mid eighteenth century witnessed what might be dubbed an economic turn that resolutely changed the trajectory of world history The discipline of economics itself emerged amidst this turn and it is frequently traced back to the work of François Quesnay and his school of Physiocracy Though lionized by the subsequent historiography of economics the theoretical postulates and policy consequences of Physiocracy were disastrous at the time resulting in a veritable subsistence trauma in France This galvanized relentless and diverse critiques of the doctrine not only in France but also throughout the European world that have hitherto been largely neglected by scholars Though Physiocracy was an integral part of the economic turn it was rapidly overcome both theoretically and practically with durable and important consequences for the history of political economy The Economic Turn brings together some of the leading historians of that moment to fundamentally recast our understanding of the origins and diverse natures of political economy in the Enlightenment

GPA News November 2012, **The Economic Theory of Costs** Matthew McCaffrey, 2017-09-01 The theory of costs is a cornerstone of economic thinking and figures crucially in the study of human action and society From the first day of a principles level course to the most advanced academic literature costs play a vital role in virtually all behaviors and economic outcomes How we make choices why we trade and how we build institutions and social orders are all problems that can be explained in light of the costs we face This volume explores develops and critiques the rich literature on costs examining some of the many ways cost remains relevant in economic theory and practice The book especially studies costs from the perspective of the Austrian or causal realist approach to economics The chapters integrate the history of economic thought with contemporary research finding valuable crossroads between numerous traditions in economics They examine the role of costs in theories of choice and opportunity costs demand and income effects production and distribution risk and interest rates uncertainty and production monopsony Post Keynesianism transaction costs socialism and management and social entrepreneurship Together these papers represent an update and restatement of a central element in the economic way of thinking Each chapter reveals how the Austrian causal realist approach to costs can be used to solve an important problem or debate in economics These chapters

are not only useful for students learning these concepts for the first time they are also valuable for researchers seeking to understand the unique Austrian perspective and those who want to apply it to new problems Civil Society's Education Christopher Winch, 2025-01-23 This book examines the relationship between the educational activities of civil society and those of the state via three case studies in vocational education political education and educational markets Winch argues that the narrower educational activities of the state cannot be understood independently of those that take place in civil society which consists of institutions such as families churches businesses trade unions charities and political associations Drawing on arguments and ideas in the work of Hume Wittgenstein Rhees Vico Hegel and Gramsci and building on the work of authors such as Bakhurst Roedl and Hamlyn the book breaks new ground in offering a philosophical account of civil society and the place of education within it It is relevant to a range of societies including those without a state or where the state has little influence located in geographically and temporally diverse contexts *The Prospect of Global History* James Belich, John Darwin, Margret Frenz, Chris Wickham, 2016-02-11 The Prospect of Global History takes a new approach to the study of global history seeking to apply it rather than advocate it The volume seeks perspectives on history from East Asian and Islamic sources as well as European ones and insists on depth in historical analysis The Prospect of Global History will speak to those interested in medieval and ancient history as well as modern history Chapters range from historical sociology to economic history from medieval to modern times from European expansion to constitutional history and from the United States across South Asia to China **The University of Oxford** L. W. B. Brockliss, 2016-04-15 This fresh and readable account gives a complete history of the University of Oxford from its beginnings in the eleventh century to the present day Written by one of the leading authorities on the history of universities internationally it traces Oxford's improbable rise from provincial backwater to one of the world's leading centres of research and teaching Laurence Brockliss sees Oxford's history as one of discontinuity as much as continuity describing it in four distinct parts First he explores Oxford as The Catholic University in the centuries before the Reformation when it was principally a clerical studium serving the needs of the Western church Then as The Anglican University in the years from 1534 to 1845 when Oxford was confessionally closed to other religions it trained the next generation of ministers of the Church of England and acted as a finishing school for the sons of the gentry and the well to do After 1845 The Imperial University saw the emergence over the following century of a new Oxford a university which was still elitist but now non-confessional became open to women as well as men took students from all round the Empire and was held together at least until 1914 by a novel concept of Christian service The final part The World University takes the story forward from 1945 to the present day and describes Oxford's development as a modern meritocratic and secular university with an ever growing commitment to high quality academic research Throughout the book Oxford's history is placed in the wider context of the history of higher education in the UK Europe and the world This helps to show how singular Oxford's evolution has been a story not of entitlement but of hard work difficult decisions and a

creative use of limited resources and advantages to keep its destiny in its own hands **Handbook of Cultural Economics, Third Edition** Ruth Towse, Trilce Navarrete Hernández, 2020-03-28 Cultural economics has become well established as a subject of interest for students and teachers of courses ranging from economics to arts administration as well as for policy makers and practitioners in the creative industries Digitisation has had a tremendous impact on many areas of the creative economy and the third edition of this popular book fully reflects it China and the End of Global Silver, 1873-1937 Austin Dean, 2020-11-15 In the late nineteenth century as much of the world adopted some variant of the gold standard China remained the most populous country still using silver Yet China had no unified national currency there was not one monetary standard but many Silver coins circulated alongside chunks of silver and every transaction became an encounter of wits China and the End of Global Silver 1873 1937 focuses on how officials policy makers bankers merchants academics and journalists in China and around the world answered a simple question how should China change its monetary system Far from a narrow technical issue Chinese monetary reform is a dramatic story full of political revolutions economic depressions chance and contingency As different governments in China attempted to create a unified monetary standard in the late nineteenth and early twentieth century the United States England and Japan tried to shape the direction of Chinese monetary reform for their own benefit Austin Dean argues convincingly that the Silver Era in world history ended owing to the interaction of imperial competition in East Asia and the state building projects of different governments in China When the Nationalist government of China went off the silver standard in 1935 it marked a key moment not just in Chinese history but in world history The Political Economy of the American Frontier Ilia Murtazashvili, 2013-09-16 Demonstrates why claim clubs are perhaps the most important explanation for the origins of and change in property institutions during an important period in American history **Reforming the Governance of the Financial Sector** David Mayes, Geoffrey Wood, 2012-12-12 Many financial institutions have in recent years failed either completely and gone into bankruptcy or failed in the sense that they have not achieved what their owners or their customers expected them to deliver This has had significant and adverse effects on customers taxpayers shareholders and sometimes management There has been much discussion of what should be done about this and some action has been taken But has it been the right kind of action Crises of the sort being experienced are low probability but high impact events This volume from an international group of scholars deals with two main issues firstly how can the governance of the financial sector by the authorities be improved and secondly how can the governance of firms and institutions within the sector be improved to render the probability and cost of future crises lower Poor governance has been one of the major contributors to the global financial crisis With better governance of and in the financial sector the financial crisis might well have been avoided altogether and certainly could have been much milder in its impact This is not simply a case of being wise after the event These problems were widely discussed before the event but little action was taken This book explores not only what the contribution of poor governance was to the crisis and

to its depth but also why it is often difficult to improve governance The volume offers a positive critique of the measures that are being put in place in the light of the experience of the crisis and suggests how they might plausibly be improved This book will be of particular interest to students and researchers of economics and international finance but will also prove profitable reading for practitioners and the interested public
