scholars of children's literature **The Impulse of Fantasy Literature** Colin N. Manlove, 2020-06-30 This book grew out of the author's wish to go beyond a formal definition of fantasy to discover a basic urge and interest common to the genre. He finds this urge to be the celebration of identity. Fantasy is ultimately concerned to heighten and praise being, whether that being is God's creation, the world, or the creations of the fantasy writer themselves. This interest can take the form of direct eulogy or of more unconscious fascination. It is seen in fantasy's conservatism and its frequently elegiac mode and is demonstrated through its formal characteristics such as circular structure and the use of juxtaposition to heighten individuality. It is more overtly present in modern than in pre-1800 fantasy, partly because modern fantasy developed as a Romantic reaction against technology and everything that reduced direct contact between people and the environment. These aspects of fantasy are illustrated from detailed discussion of the tales of Grimm, Walter de la Mare's *Told Again*, W. M. Thackeray's *The Rose and the Ring*, Charles Williams's prose fantasies, Ursula Le Guin's *Earthsea* trilogy, E. Nesbit's magic books, George MacDonald's *Phantastes* and *Lilith*, T. H. White's *The Once and Future King*, Mervyn Peake's *Gormenghast* novels, William Morris's late romances, Lord Dunsany's *The King of Elfland's Daughter*, E. R. Eddison's *The Worm Ouroboros*, and Peter Beagle's *The Last Unicorn*. Together, these authors and works provide a cross-section of what is a fundamentally panegyric genre, demonstrating its variety, its strengths, and its limitations.

The History of the Science-fiction Magazine Michael Ashley, 2000 This third volume in Mike Ashley's four-volume study of the science-fiction magazines focuses on the turbulent years of the 1970s when the United States emerged from the Vietnam War into an economic crisis. It saw the end of the Apollo moon programme and the start of the ecology movement. This proved to be one of the most complicated periods for the science-fiction magazines. Not only were they struggling to survive within the economic climate, they also had to cope with the death of the father of modern science-fiction, John W. Campbell Jr, while facing new and potentially threatening opposition. The market for science-fiction diversified as never before with the growth in new anthologies, the emergence of semi-professional magazines, the explosion of science-fiction in college, the start of role-playing, gaming magazines, underground and adult comics, and with the success of *Star Wars* media magazines. This volume explores how the traditional science-fiction magazines coped with this, from the death of Campbell to the start of the major popular science magazine *Omni* and the first dreams of the Internet.

Forum , 1979 **Studio Ghibli Animation as Adaptations** Dominic J. Nardi, Keli Fancher, 2025-05-15 This collection investigates how Hayao Miyazaki Isao Takahata and other Studio Ghibli storytellers have approached the process of

reimagining literary sources for animation Studio Ghibli is renowned for its original storytelling in films like *My Neighbor Totoro* but many of its most famous films including *Howl's Moving Castle* and *Ponyo* have their origins in pre-existing novels, manga, or fairy tales. Studio Ghibli's adaptations seldom directly translate source material to animation but instead transform the works to incorporate themes or imagery central to the studio's sensibilities. Studio Ghibli Animation as Adaptations explores how these adaptations often blur genre boundaries and raise questions about what constitutes fidelity to source material. The collection also shows how the studio reinterprets and recontextualizes stories across cultures for Japanese audiences and across mediums like manga.

Fantastic Spiritualities J'annine Jobling, 2010-07-01 In this work Jobling argues that religious sensibility in the Western world is in a process of transformation but that we see here change, not decline, and that the production and consumption of the fantastic in popular culture offers an illuminating window onto spiritual trends and conditions. She examines four major examples of the fantastic genre: the *Harry Potter* series by Rowling, *His Dark Materials* by Pullman, *Buffy the Vampire Slayer* by Whedon, and the *Earthsea* cycle by Le Guin, demonstrating that the spiritual universes of these four iconic examples of the fantastic are actually marked by profoundly modernistic assumptions, raising the question of just how contemporary spiritualities, often deemed postmodern, navigate philosophically the waters of truth, morality, authority, selfhood, and the divine. Jobling tackles what she sees as a misplaced disregard for the significance of the fantasy genre as a worthy object for academic investigation by offering a full-length thematic comparative and cross-disciplinary study of the four case studies proposed, chosen because of their significance to the field and because these books have all been posited as exemplars of a postmodern religious sensibility. This work shows how attentiveness to spiritual themes in cultural icons can offer the student of theology and religions insight into the framing of the moral and religious imagination in the late twentieth and twenty-first centuries and how this can prompt traditional religions to reflect on whether their own narratives are culturally framed in a way resonating with the signs of the times.

The Legacies of Ursula K. Le Guin Christopher L. Robinson, Sarah Bouttier, Pierre-Louis Patoine, 2021-09-19 The Legacies of Ursula K. Le Guin explores how Le Guin's fiction and essays have built a speculative ethical practice engaging indigenous knowledge and feminism while crafting utopias in which human and other-than-human life forms enter into new relations. Her work also delineates new ways of making sense of the science of science fiction. The authors of this collection provide up-to-date discussions of well-known works as well as more experimental writings. Written in an accessible style, Legacies will appeal to any readers interested in literature, science fiction, and fantasy as well as specialists of science and technology studies, philosophy of science, ethics, gender studies, indigenous studies, and posthumanism.
