Historical Dictionary of the World Health Organization Kelley Lee,Jennifer Fang,2013 The World Health Organization s history spans more than six decades The past twenty years has been a particularly busy period in the organization s development given the transition from international to global health cooperation and thus the need to adapt to major changes in its operating environment Consequently the WHO has been a direct part of new institutional arrangements and has shared in increased funding to provide for global health It has also had to adapt its activities and programs in response to rival initiatives leading to many changes not only to the names of specific parts of the WHO but also to the nature of their activities This second edition explores the organization s institutional complexity Back cover

Eradication Nancy Leys Stepan,2013-02-15 The dream of a world completely free of disease may seem utopian but eradication used in its modern sense to mean the reduction of the number of cases of a disease to zero by deliberate public health interventions has been pursued repeatedly Campaigns against yellow fever malaria and smallpox have been among the largest most costly programs

ever undertaken in international public health But only one so far has been successful that against smallpox And yet in 2007 Bill and Melinda Gates surprised the world with the announcement that they were committing their foundation to eradicating malaria Polio eradication is another of their priorities Are such costly programs really justifiable The first comprehensive account of the major disease eradication campaigns from the early twentieth century right up to the present Eradication places these ambitious goals in their broad historical and contemporary contexts From the life and times of the American arch eradicationist Dr Fred Lowe Soper 1893 1977 who was at the center of many of the campaigns and controversies surrounding eradication in his lifetime to debates between proponents of primary health care approaches to ill health versus the eradicationists Nancy Leys Stepan s narrative suggests that today these differing public health approaches may be complementary rather than in conflict Enlightening for general readers and specialists alike Eradication is an illuminating look at some of the most urgent problems of health and disease around the world To Cast Out Disease John Farley, 2004 This is the first history of the Rockefeller Foundation s International Health Division 1913 1951 which was one of the most important public health agencies of the 20th century a precursor of the World Health Organization Based on extensive primary research the book is enlivened with character sketches and descriptions of the conflicts among the medical barons who ran the division as they attempted to eradicate many serious diseases and to set up schools of public health and nursing around the world Federal Bodysnatchers and the New Guinea Virus Robert S. Desowitz, 2004 The world has been confident that biomedical science would protect it from devastating plagues The wake up call sounded at the outbreak of the AIDS epidemic West Nile virus malaria and African sleeping sickness Desowitz traces the histories of these diseases and the issues people must confront about them **Mosquitopia** Marcus Hall, Dan Tamir, 2021-09-01 This edited volume brings together natural scientists social scientists and humanists to assess if or how we may begin to coexist harmoniously with the mosquito The mosquito is humanity s deadliest animal killing over a million people each year by transmitting malaria yellow fever Zika and several other diseases Yet of the 3 500 species of mosquito on Earth only a few dozen of them are really dangerous so that the question arises as to whether humans and their mosquito foe can learn to live peacefully with one another Chapters assess polarizing arguments for conserving and preserving mosquitoes as well as for controlling and killing them elaborating on possible consequences of both strategies This book provides informed answers to the dual question could we eliminate mosquitoes and should we Offering insights spanning the technical to the philosophical this is the go to book for exploring humanity s many relationships with the mosquito which becomes a journey to finding better ways to inhabit the natural world Mosquitopia will be of interest to anyone wanting to explore dependencies between human health and natural systems while offering novel perspectives to health planners medical experts environmentalists and animal rights advocates The Open Access version of this book available at <http://www.taylorfrancis.com/books/e/9781003056034> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license *Epidemics and Society*

Frank M. Snowden, 2019-10-22 A wide ranging study that illuminates the connection between epidemic diseases and societal change from the Black Death to Ebola This sweeping exploration of the impact of epidemic diseases looks at how mass infectious outbreaks have shaped society from the Black Death to today In a clear and accessible style Frank M Snowden reveals the ways that diseases have not only influenced medical science and public health but also transformed the arts religion intellectual history and warfare A multidisciplinary and comparative investigation of the medical and social history of the major epidemics this volume touches on themes such as the evolution of medical therapy plague literature poverty the environment and mass hysteria In addition to providing historical perspective on diseases such as smallpox cholera and tuberculosis Snowden examines the fallout from recent epidemics such as HIV AIDS SARS and Ebola and the question of the world's preparedness for the next generation of diseases Water and Sanitation-Related Diseases and the Changing Environment
