House of Commons, 1909 **The Problem of Disenchantment** Egil Asprem, 2018-05-31 Challenges the conventional view of a disenchanted and secular modernity and recovers the complex relation that exists between science religion and esotericism in the modern world Max Weber famously characterized the ongoing process of intellectualization and rationalization that separates the natural world from the divine by excluding magic and value from the realm of science and reason and fact from the realm of religion as the disenchantment of the world Egil Asprem argues for a conceptual shift in how we view this key narrative of modernity Instead of a sociohistorical process of disenchantment that produces increasingly rational minds Asprem maintains that the continued presence of magic and enchantment in people s everyday experience of the world created an intellectual problem for those few who were socialized to believe that nature should contain no such incalculable mysteries Drawing on a wide range of early twentieth century primary sources from theoretical physics occultism embryology radioactivity psychical research and other fields Asprem casts the intellectual life of high modernity as a synchronic struggle across conspicuously different fields that shared surprisingly similar intellectual problems about value meaning and the limits of knowledge The Problem of Disenchantment is in its entirety extraordinarily well researched argued and written representing at once the most complete and nuanced treatment of the notion of disenchantment within this network of scientific religious philosophical and esoteric discourses and currents Nova Religio **Narrative and critical history of America, ed. by J. The Philosophical Writings of Prémontval Lloyd Strickland, 2018-03-28 This volume contains the key philosophical writings of maverick Enlightenment philosopher Andr Pierre Le Guay de Pr montval 1716 1764 Pr montval was a prolific member of the Berlin Academy of Sciences and in his career as academic he wrote a series of essays and books on a range of core philosophical topics such as necessity and contingency free will sufficient reason personal identity the nature of the mind and its relationship with the body optimism and the existence of God Pr montval s philosophy shaped by his opposition to key philosophers such as Descartes Leibniz and Wolff is notable for a number of original and often provocative positions on key philosophical issues of the time which he supported by inventive critiques and a raft of novel arguments In addition to developing a highly original proof for the existence of God based on the principles of atheism Pr montval argued that all possible beings exist and do so necessarily and therefore eternally he insisted that the universe unfolded through an interplay of chance and necessity its direction influenced by God but not under God s direct control and he considered free will a curse and the main impediment to the realization of the only aim fitting for God which was to make all beings happy and holy as quickly as possible His writings are notable for anticipating modern developments such as open theism process

theology and animal theodicy In this volume Lloyd Strickland makes Pr montval s key philosophical writings available in English for the first time In making these translations Strickland a well respected translator of Leibniz s work has consulted the original manuscripts to ensure the greatest accuracy and as befits a scholarly edition the texts are meticulously documented with copious annotations Accompanying the texts is a substantial and informative introduction **Miscellanea cartographica** C.
