Kevin J. Vanhoozer, Craig G. Bartholomew, Daniel Treier, N.T. Wright, 2005-11-01 For the pastor or serious layperson the realm of biblical interpretation can be a confusing maze of personalities communities methods and theories This maze can often result in obscuring the main goal of interpreting Scripture hearing and knowing God better The Dictionary for Theological Interpretation of the Bible is a groundbreaking reference tool that introduces readers to key names theories and concepts in the field of biblical interpretation It discusses these approaches and evaluates their helpfulness in enabling Christians to hear what God is saying to the church through Scripture The contributors come from a variety of backgrounds and the dictionary covers a broad range of topics with both clarity and depth **Kant's**

Construction of Nature Michael Friedman, 2013-01-17 Kant's *Metaphysical Foundations of Natural Science* is one of the most difficult but also most important of Kant's works. Published in 1786 between the first 1781 and second 1787 editions of the *Critique of Pure Reason*, the *Metaphysical Foundations* occupies a central place in the development of Kant's philosophy but has so far attracted relatively little attention compared with other works of Kant's critical period. Michael Friedman's book develops a new and complete reading of this work and reconstructs Kant's main argument clearly and in great detail, explaining its relationship to both Newton's *Principia* and eighteenth-century scientific thinkers such as Euler and Lambert. By situating Kant's text relative to his pre-critical writings on metaphysics and natural philosophy and in particular to the changes Kant made in the second edition of the *Critique*, Friedman articulates a radically new perspective on the meaning and development of the critical philosophy as a whole.

Nietzsche as Metaphysician Justin Remhof, 2022-11-18 This book defends the controversial view that Nietzsche is a metaphysician against a long-standing tendency to sever Nietzsche from metaphysical philosophy. Remhof presents a metametaphysical treatment of Nietzsche's writings to show that for Nietzsche the questions, answers, methods, and subject matters of metaphysical philosophy are not only perfectly legitimate but also crucial for understanding the world and our place within it. The book examines aspects of Nietzsche's thought that have received little attention in the literature, including his view of what makes metaphysics possible, his metaphysics of science, his naturalized metaphysics, how he appeals to the intuitions of readers, how he employs a priori reasoning, how he uses metaphysical grounding explanations, and how metaphysics is intertwined with topics central to his philosophical thinking, including his understanding of becoming, ethics, nihilism, life perspective, amor fati, and eternal recurrence. *Nietzsche as Metaphysician* will be of interest to scholars and advanced students working on Nietzsche and the history of metaphysics.

Philosophy as World Literature Jeffrey R. Di Leo, 2020-11-26 What does it mean to consider philosophy as a species of not just literature but world literature? The authors in this collection explore philosophy through the lens of the worlding of literature—that is, how philosophy is connected and reconnected through global literary networks that cross borders, mix stories, and speak in translation and dialect. Historically, much of the world's most influential philosophy, from Plato's dialogues and Augustine's confessions to Nietzsche's aphorisms and Sartre's plays, was a form of literature as well as by extension a form of world literature. *Philosophy as World Literature* offers a variety of accounts of how the worlding of literature problematizes the national categorizing of philosophy and brings new meanings and challenges to the discussion of intersections between philosophy and literature.

Whitehead and Philosophy of Education Malcolm D. Evans, 1998 That process philosophy can be the foundation of the theory and practice of educating human beings is the main argument of this book. The process philosophy of Alfred North Whitehead (1861–1947) is the particular thinking on which this book is based. Readers are shown that Whitehead's process philosophy provides a frame, a conceptual matrix that addresses their concerns about education and offers direction for their educative acts. Whitehead theorized that all living entities are connected in

some way Relatedness connectedness and holism are recurring themes in this exploration of Whitehead's implied philosophy of education Whitehead never wrote a philosophy of education but his writings over a period of nearly thirty years reveal a persistent interest and concern with education His work ranging from Introduction to Mathematics 1911 to Adventures of Ideas 1938 is drawn on here to construct not Whitehead's philosophy of education but a Whiteheadian philosophy of education Whitehead and Philosophy of Education brings to scholars and students of education an understanding of Whitehead as an important figure in philosophy particularly philosophy of education an acquaintance with process philosophy a brief treatment of Whitehead's life and an account of events and experiences that influenced his philosophizing and an exploration of the educationally salient concepts found in Whitehead's formal and informal philosophy with special attention to Whitehead's ideas about creativity process rhythm wisdom and knowledge Whitehead writes of phases of the rhythm of education romance precision and generalization The book is organized with attention to these three phases Part One Romance introduces readers to Whitehead the person and the change of context for educating from a mechanistic world view to an organismic one Part Two Precision examines Whitehead's writings as they relate to process philosophy and to educating Part Three Generalization is an application of the explorations of Parts One and Two yielding a construction of a Whiteheadian philosophy of education and suggestions for educational practice
