Knowledge Unbound Peter Suber, 2016-03-25 Influential writings make the case for open access to research explore its implications and document the early struggles and successes of the open access movement Peter Suber has been a leading advocate for open access since 2001 and has worked full time on issues of open access since 2003 As a professor of philosophy during the early days of the internet he realized its power and potential as a medium for scholarship As he writes now it was like an asteroid crash fundamentally changing the environment challenging dinosaurs to adapt and challenging all of us to figure out whether we were dinosaurs When Suber began putting his writings and course materials online for anyone to use for any purpose he soon experienced the benefits of that wider exposure In 2001 he started a newsletter the Free Online Scholarship Newsletter which later became the SPARC Open Access Newsletter in which he explored the implications of open access for research and scholarship This book offers a selection of some of Suber

s most significant and influential writings on open access from 2002 to 2010 In these texts Suber makes the case for open access to research answers common questions objections and misunderstandings analyzes policy issues and documents the growth and evolution of open access during its most critical early decade [Archives](#) ,2023-11-23 Chapter 23 is published open access under a CC BY NC ND 4.0 license and is free to read or download from Oxford Academic Archives have never been more complex expansive or ubiquitous Gargantuan in scale and conception yet never sufficient or complete the archive is on the one hand a space for empowerment and expression and on the other an instrument of constraint and repression The way in which the archive is structured made available and developed plays a central role in how societies define their values and ethics Archives Power Truth and Fiction is a wide ranging and innovative volume which highlights the vibrancy and urgency of the field by bringing together contributors from many different disciplines and backgrounds including archivists historians literary scholars digital researchers and creative practitioners The archive of the twenty first century is a fluid and multi vocal space that challenges at every point the hegemonic and positivistic assumptions which shaped traditional ideas of the archive The massive growth of digital archives further complicates the picture Archives Power Truth and Fiction is designed to help the reader draw threads through the rapidly changing and shifting multiverse of archives The interdisciplinary and international contributors use a wide range of examples from the Middle Ages to the Windrush scandal to unsettle preconceptions encourage debate and draw out issues generated by the perpetual motion of the archive

Burroughs Unbound S. E. Gontarski,2021-11-18 In addition to contributing significantly to the growing field of Burroughs scholarship Burroughs Unbound also directly engages with the growing fields of textual studies archival research and genetic criticism asking crucial questions thereby about the nature of archives and their relationship to a writer's work These questions about the archive concern not only the literary medium In the 1960s and 1970s Burroughs collaborated with filmmakers sound technicians and musicians who helped re contextualized his writings in other media Burroughs Unbound examines these collaborations and explores how such multiple authorship complicates the authority of the archive as a final or complete repository of an author's work It takes Burroughs seriously as a radical theorist and practitioner who critiqued drug laws sexual practice censorship and what we today call a society of control More broadly his work continues to challenge our common assumptions about language authorship textual stability and the archive in its broadest definition

The Unbound Book Joost Kircz,Adriaan van der Weel,2013 A look at what the current digital revolution will mean for conventional books in the future [Blair Unbound](#) Anthony Seldon,2008-09-04 The first volume of Anthony Seldon's riveting and definitive life of Tony Blair was published to great acclaim in 2004 Now as the Labour Party and the country get used to the idea of a new leader and a new Prime Minister Seldon delivers the most complete authoritative and compelling account yet of the Blair premiership Picking up the story in dramatic fashion on 11 September 2001 Seldon recaps very briefly Blair's trajectory to what may now be regarded as the high point of his leadership and then brings us right up to date as Blair hands

over the reins to his arch rival Gordon Brown Based on hundreds of original interviews with key insiders many of whose views have hitherto been kept private BLAIR UNBOUND serves both as a fascinating volume two of this masterclass in political biography and a highly revealing and compelling book in its own right **Textual Agency** Ann M. Gomez-Bravo, 2013-12-11 Textual Agency examines the massive proliferation of poetic texts in fifteenth century Spain focusing on the important yet little known *cancionero* poetry the largest poetic corpus of the European Middle Ages Ana M G mez Bravo situates this cultural production within its social political and material contexts She places the different forms of document production fostered by a shifting political and urban model alongside the rise in literacy and access to reading materials and spaces At the core of the book lies an examination of both the materials of writing and how human agents used and transformed them giving way to a textual agency that pertains not only to writers but to the inscribed paper G mez Bravo also explores how authorial and textual agency were competing forces in the midst of an era marked by the institution of the Inquisition the advent of the absolutist state the growth of cities and the constitution of the Spanish nation In the Name of El Pueblo Paul Eiss, 2010-07-30 An anthropological and historical analysis of the multiple meanings of the term *el pueblo* among working class indigenous and mestizo populations in Mexico's Yucatán peninsula **Archival Afterlives** Laura Hughes, 2023-11-15 A capacious analysis of a legendary intellectual friendship and the material legacies it left behind Over the course of their decades long friendship Hélène Cixous and Jacques Derrida assembled overlapping archives of written experiments and exchanges that document a shared interest in their literary afterlives In this incisive account Laura Hughes shows how pushing against the limits of writing and of life itself means not only imagining but manifesting a community of future readers Archival Afterlives Cixous Derrida and the Matter of Friendship examines the embodied nature of literary creation taking letters fragments notes and other ephemera as objects of critical analysis and care Combining close readings of key texts and previously unexamined archival materials Hughes traces critical connections between Cixous and Derrida between the theoretical and the autobiographical and between life writing and its limits In putting deconstruction into dialogue with new material analyses and archive studies Archival Afterlives positions this historical and intellectual relationship as a lens through which to reexamine the legacy of critical theory itself Catalogue of Publications Issued by the Government of the United States United States. Superintendent of Documents, 1978-04 February issue includes Appendix entitled Directory of United States Government periodicals and subscription publications September issue includes List of depository libraries June and December issues include semiannual index **Globalization Development and Social Justice** Ann El Khoury, 2015-03-27 Are there existing alternatives to corporate globalization What are the prospects for and commonalities between communities and movements such as Occupy the World Social Forum and alternative economies Globalization Development and Social Justice advances the proposition that another globalization is not only possible but already exists It demonstrates that there are multiple pathways towards development with social justice and argues that

enabling propositional agency rather than oppositional agency such as resistance is a more effective alternative to neoliberal globalization El Khoury develops a theory of infraglobalization that emphasizes creative constitution not just contestation of global and local processes The book features case studies and examples of diverse economic practice and innovative emergent political forms from the Global South and North These case studies are located in the informal social economy and community development as well as everyday practices from prefigurative politics to community cooperatives and participatory planning This book makes an important contribution to debates about the prospects for and practices of a transformative grassroots globalization and to critical debates about globalization and development strategies It will be of interest to students and scholars of international relations globalization social movement studies political and economic geography sociology anthropology and development studies

The Space Race Vasil Teigens, The Space Race was a rivalry of the twentieth century between two great Super Powers in the Cold War the Soviet Union USSR and the United States USA aimed at achieving the highest positions in space flight capabilities It derives from the ballistic missile based nuclear arms race that followed the Second World War The technological advantage needed to quickly achieve milestones in space flight was considered essential for national security and combined with the symbolism and ideology to time The Space Race led to pioneering efforts to launch artificial satellites unmanned space probes to the Moon Venus and Mars and human space flights in low Earth orbit and the Moon

Intergalactic Travel and Asteroid Mining Daniel Mikelsten, Asteroid mining is the exploitation of raw materials from asteroids and other minor planets including near Earth objects Based on known terrestrial reserves and growing consumption in both developed and developing countries key elements needed for modern industry and food production could be exhausted on Earth within 50 to 60 years In response it has been suggested that platinum cobalt and other valuable elements from asteroids may be mined and sent to Earth for profit used to build solar power satellites and space habitats and water processed from ice to refuel orbiting propellant depots Looking beyond the Milky Way there are at least 2 trillion other galaxies in the observable universe Space colonization can roughly be said to be possible when the necessary methods of space colonization become cheap enough to meet the cumulative funds that have been gathered for the purpose in addition to estimated profits from commercial use of space Intergalactic travel would either have to involve voyages lasting millions of years or a possible faster than light propulsion method based on speculative physics such as the Alcubierre drive There are however no scientific reasons for stating that intergalactic travel is impossible in principle Uploaded human minds or AI may be transmitted to other galaxies in the hope some intelligence there would receive and activate them

Colonization of Near-Earth Space Peter Skalfist, Several project teams from NASA ESA and other organizations have investigated the possibility of establishing a colony in orbit They found that the Moon and near Earth asteroids have enough materials available that solar energy is readily available in large quantities The advantages of this system are its proximity to the Earth and its lower escape velocity which facilitates the exchange of goods and services

Machines for Living Victoria Rosner, 2020-02-04 Changes in the routines of domestic life were among the most striking social phenomena of the period between the two World Wars when the home came into focus as a problem to be solved reimagined streamlined electrified and generally cleaned up Modernist writers understood themselves to be living in an epochal moment when the design and meaning of home life were reconceived Moving among literature architecture design science and technology *Machines for Living* shows how the modernization of the home led to profound changes in domestic life and relied on a set of emergent concepts including standardization scientific method functionalism efficiency science and others that form the basis of literary modernism and stand at the confluence of modernism and modernity Even as modernist writers criticized the expanding reach of modernization into the home they drew on its conceptual vocabulary to develop both the thematic and formal commitments of literary modernism Rosner's work develops a new methodology for interdisciplinary modernist studies and shows how the reinvention of domestic life is central to modernist literature □□□
