Understanding Building Stones and Stone Buildings John Hudson, John Cosgrove, 2019-04-24 This book covers the wide spectrum of subjects relating to obtaining and using building stones starting with their geological origin and then describing the nature of granites volcanics limestones sandstones flint metamorphic stones breccias and conglomerates with emphasis being placed on how to recognise the different stones via the many illustrated examples from Great Britain and other countries The life of a building stone is

explained from its origin in the quarry through its exposure to the elements when used for a building to its eventual deterioration. The structure of stone buildings is then discussed with explanations of the mechanics of pillars, lighthouses and walls, arches, bridges, buttresses and roof vaults, plus castles and cathedrals. The sequence of the historical architectural styles of stone buildings is explained from the early days through to postmodern buildings. Special attention is paid to two famous architects: the Roman Vitruvius and the English Sir Christopher Wren, who designed and supervised the construction of St Paul's Cathedral in London. To demonstrate many of the concepts presented, two exemplary stone buildings are described in detail: the Albert Memorial in London and Durham Cathedral in northern England. The former building is interesting because it is comprised of a cornucopia of different building stones, and the latter building because of its architecture and sandstone decay mechanisms. In the final Chapter, ruined stone buildings are discussed, the many reasons for their decay and the possibility of their rebirth via digital recording of their geometry. The book has over 350 pages and is illustrated with more than 450 diagrams and colour photographs of both the various stones and the associated stone buildings. Readers' knowledge of the subject will be greatly enhanced by these images and the related explanatory text. A wide-ranging references and bibliography section is also included.

New English Interiors Elizabeth Metcalfe, 2024-10-01. Of the countless interior design trends that come and go every year, there is one that endures: the ever-evolving English style. Explore the homes of 22 of England's most exciting creatives with interiors writer Elizabeth Metcalfe and photographer Dean Hearne. An inspiration to people across the world, this is a style rich with colour, pattern and a certain eccentricity. Wallpapers, fabrics, charming details and lovingly collected objects are all among the key components of a style that embraces individuality and benefits from its layers being allowed to evolve slowly. *New English Interiors* explores the exclusive homes of England's most exciting creatives, from interior designers and illustrators to artists and antique dealers. From fashion stylist and designer Lucinda Chambers' colourful kaleidoscope of a home in west London to illustrator Fee Greening's earthy-toned cottage in Dorset, this is a celebration of colour and pattern in its infinite variety. Other interiors featured belong to the likes of designer Cath Kidston, artists Annie Morris and Idris Khan, and designers Luke Edward Hall and Duncan Campbell. While they range aesthetically from the bold and theatrical to the more earthy and homespun, there is one thing that unites them all: they are deeply personal visual moodboards for their owners. None of them are static; either these interiors are ever-evolving and that is part of their joy. From small city flats to country cottages, this promises to be the perfect inspiration for anyone who might want to live with glorious layers of colour and pattern. It's a lesson on how to let our personalities guide how we decorate our homes.

culture society and historical context social practices perceptions and behaviours hiking trails and pilgrimage routes health well being and psychology and method planning and design Each of these highlights current approaches and major themes in research on walking in a range of different environments This handbook carves out a unique niche in the study of walking The international and cross disciplinary nature of the contributions of the book are expected to be of interest to numerous academic fields in the social and health sciences as well as to urban and regional planners and those in charge of the management of outdoor recreation and tourism globally
