

The background of the cover is a silhouette of a person standing on a dark, uneven horizon. The person is facing right, holding a long staff or pole in their right hand, which extends towards the ground. The person's left hand is raised towards their head. In the background, a city skyline is visible, with several tall buildings silhouetted against a bright, orange and yellow sky, suggesting a sunset or sunrise. The overall color palette is dominated by warm, earthy tones of orange, red, and black.

The Wayfinders Why Ancient Wisdom Matters In The Modern World:

The Wayfinders Wade Davis, 2009 Many of us are alarmed by the accelerating rates of extinction of plants and animals But how many of us know that human cultures are going extinct at an even more shocking rate While biologists estimate that 18 percent of mammals and 11 percent of birds are threatened and botanists anticipate the loss of 8 percent of flora anthropologists predict that fully 50 percent of the 7 000 languages spoken around the world today will disappear within our lifetimes And languages are merely the canaries in the coal mine what of the knowledge stories songs and ways of seeing encoded in these voices In *The Wayfinders* Wade Davis offers a gripping and enlightening account of this urgent crisis He leads us on a fascinating tour through a handful of indigenous cultures describing the worldviews they represent and reminding us of the encroaching danger to humankind's survival should they vanish

The Wayfinders Wade Davis, 2013-05-01 Every culture is a unique answer to a fundamental question What does it mean to be human and alive In *The Wayfinders* renowned anthropologist winner of the prestigious Samuel Johnson Prize and National Geographic Explorer in Residence Wade Davis leads us on a thrilling journey to celebrate the wisdom of the world's indigenous cultures In Polynesia we set sail with navigators whose ancestors settled the Pacific ten centuries before Christ In the Amazon we meet the descendants of a true lost civilization the Peoples of the Anaconda In the Andes we discover that the earth really is alive while in Australia we experience Dreamtime the all embracing philosophy of the first humans to walk out of Africa We then travel to Nepal where we encounter a wisdom hero a Bodhisattva who emerges from forty five years of Buddhist retreat and solitude And finally we settle in Borneo where the last rainforest nomads struggle to survive Understanding the lessons of this journey will be our mission for the next century For at risk is the human legacy a vast archive of knowledge and expertise a catalogue of the imagination Rediscovering a new appreciation for the diversity of the human spirit as expressed by culture is among the central challenges of our time

Global Brain Singularity Cadell Last, 2020-07-30 This book introduces readers to global brain singularity through a logical meditation on the temporal dynamics of the universal process Global brain singularity is conceived of as a future metasystem of human civilization that represents a qualitatively higher coherence of order To better understand the potential of this phenomenon the book begins with an overview of universal history The focus then shifts to the structure of human systems and the notion that contemporary global civilization must mediate the emergence of a commons that will transform the future of politics economics and psychosocial life in general In this context the book presents our species as biocultural evolutionary agents attempting to create a novel and independent domain of technocultural evolution that affords us new levels of freedom Lastly the book underscores the internal depths of the present moment structured by a division between subject and object The nature of the interaction between subject and object would appear to govern the mechanics of a spiritual process that is key to understanding the meaning of singularity inclusive of observers Given its scope the book will appeal to readers interested in systems approaches to the emerging world society especially historians philosophers and social scientists

Creating the Third Force Maureen P. Flaherty, Hamdesa Tusso, 2016-11-21 The profession of peacemaking has been practiced by indigenous communities around the world for many centuries however the ethnocentric world view of the West which dominated the world of ideas for the last five centuries dismissed indigenous forms of peacemaking as irrelevant and backward tribal rituals Neither did indigenous forms of peacemaking fit the conception of modernization and development of the new ruling elites who inherited the postcolonial state The new profession of Alternative Dispute Resolution ADR which emerged in the West as a new profession during the 1970s neglected the tradition and practice of indigenous forms of peacemaking The scant literature which has appeared on this critical subject tends to focus on the ritual aspect of the indigenous practices of peacemaking The goal of this book is to fill this lacuna in scholarship More specifically this work focuses on the process of peacemaking exploring the major steps of process of peacemaking which the peacemakers follow in dislodging antagonists from the stage of hostile confrontation to peaceful resolution of disputes and eventual reconciliation The book commences with a critique of ADR for neglecting indigenous processes of peacemaking and then utilizes case studies from different communities around the world to focus on the following major themes the basic structure of peacemaking process change and continuity in the traditions of peacemaking the role of indigenous women in peacemaking the nature of the tools peacemakers deploy common features found in indigenous processes of peacemaking and the overarching goals of peacemaking activities in indigenous communities

Media, Culture and Human Violence Jeff Lewis, 2015-11-18 Humans of the advanced world are the most violent beings of all times This violence is evident in the conditions of perpetual warfare and the accumulation of the most powerful and destructive arsenal ever known to humankind It is also evident in the devastating impact of advanced world economy and cultural practices which have led to ecological devastation and the current era of mass species extinction one of

only six mass extinction events in planetary history and the only one caused by the actions of a single species humans This violence is manifest in our interpersonal relationships and the ways in which we organize ourselves through hierarchical systems that ensure the wealth and privilege of some against the penury and misery of others In this new and highly original book Jeff Lewis argues that violence is deeply inscribed in human culture thinking and expressive systems media Lewis contends that violence is not an inescapable feature of an aggressive human nature Rather violence is laced through our desires and dispositions to communalism and expressive interaction From the near extinction of all Homo sapiens around 74 000 years ago the invention of culture and media enabled humans to imagine and articulate particular choices and pleasures Organized intergroup violence or warfare emerged through the exercise of these choices and their expression through larger and increasingly complex human societies This agitation of amplified desire hierarchical social organization and mediated knowledge systems has created a cultural volition of violent complexity which continues into the present Media Culture and Human Violence examines the current conditions of conflict and harm as an expression of our violent complexity Theory of Knowledge for the IB Diploma: Teaching for Success Carolyn P. Dissent, Revolution and Liberty Beyond Earth Charles Cockell,2016-03-10 This volume provides an in depth discussion on the central question how can people express and survive dissent and disagreement in confined habitats in space The discussion is an important one because it could be that the systems of inter dependence required to survive in space are so strong that dissent becomes impossible John Locke originally said that people have a right to use revolution to overthrow a despotic regime But if revolution causes violence and damage that causes depressurisation with the risk of killing many people is it even permissible to have a revolution How then are people to express their liberty or dissatisfaction with their rulers The emergence of structures of dissent and disagreement is an essential part of the construction of a framework of liberty in space revolution is just the extreme example and thus the topic deserves in depth and immediate attention Even today the way in which we assemble organisations and corporations for the government and private exploration of space must take into account the need for mechanisms to allow people to express dissent **Theory of Knowledge Third Edition** Nicholas Alchin,Carolyn P.
