When Nature Strikes Marsha L. Baum, 2007-06-30 Both law and weather affect us every day of our modern lives yet most people do not know how the weather has affected developments in the law nor are they aware of how the law has attempted to develop ways to affect the weather When Nature Strikes is the first book to examine the various areas in which law and weather meet and affect each other This one of a kind work describes the law related to weather in the United States in the context of specific cases legislation and administrative legal action For example weather can be the means to commit a crime or the factor that turns an event from a terrible accident into a criminal act Weather can be a defense against liability in both civil and criminal cases People seek relief in court from the harm caused by weather events whether a slip on the ice or the horrible devastation wrought by a deadly hurricane Courts and the criminal justice system can be affected by weather events that prevent physical access to the courthouse or that destroy evidence Through laws passed by Congress U S weather services have evolved from simply weather recording into weather forecasting and warning systems Federal patent law offers monopolies over inventions to encourage inventors to develop new devices that increase human safety in extreme weather or to improve methods such as cloud seeding or wind energy Canada's Changing North William C. Wonders, 2003-08-27

Among the many recent developments explored in Canada's Changing North is the legal recognition of aboriginal rights by the Canadian state which has led directly to significant increases in their political and economic power. It also examines how economic development which has long focused on non renewable natural resources particularly minerals has grown to an enormous scale. Development of arctic oil and gas which hinges on world supplies and national and international politics has meant major changes across the North. Some of the new national parks in the Canadian North are already under threat from mineral development. Northern tourism has made it possible for a wide variety of affluent visitors to visit hitherto remote areas affecting the ecology. The final selection on northern challenges discusses critical issues such as the impact of climatic change, the social needs e.g. housing, education of a rapidly increasing aboriginal population, environmental protection of unique regions and defence of Arctic sovereignty. Of the sixty two readings in this edition forty one are new.

Nobody's Law Marc Hertogh,2018-06-14 Nobody s Law shows how people who are disappointed disenchanted and outraged about the justice system gradually move away from law Using detailed case studies and combining different theoretical perspectives this book explores the legal consciousness of ordinary people businessmen and street level bureaucrats in the Netherlands The empirical research in this study tells an original and alternative narrative about the role of law in everyday life While previous studies emphasize the law s hegemony and argue that it s all over Hertogh shows that legal proliferation makes it harder for people to know and subsequently identify with the law As a result official law has become increasingly remote and irrelevant to many people The central finding presented in this highly topical text is that these developments signal a process of legal alienation a gradual and mundane process with potentially serious consequences for the legitimacy of law A timely and original study this book will be of particular interest to scholars in the fields of law and society socio legal studies and legal theory NAVENVPREDRSCHFAC Contractor Report CR ,1989
