*Between Desire and Reason* Fernando Simón-Yarza,2019-11-06 Respect for and promotion of human rights have come to be seen as the basis of legitimacy of modern Western civilization There is nevertheless a striking contrast between our common view on the importance of rights and our profound disagreement on their meaning and content This disagreement has become increasingly sharp in the last decades due to the emergence of controversial new rights This book offers an in depth account of the most important moral debates exploring the ethical and political foundations underlying the different understandings of rights In the first part the author focuses on the role played by the ideas of good and reason in the Thomistic Aristotelian and Kantian traditions and he compares those concepts with the main currents of contemporary liberalism which among other things focus on our emancipation from the

limits of nature The book attempts to show the dehumanizing effects of denying the relevance of integral human good in defining the scope of human rights and liberties and offers an alternative way forward for our understanding of human rights in a pluralistic society

**Geopolitics and the Great Powers in the 21st Century** C. Dale Walton, 2007-06-11

This book argues that in the twenty first century Eastern Eurasia will replace Europe as the theatre of decision in international affairs and that this new geographic and cultural context will have a strong influence on the future of world affairs For half a millennium the great powers have practised what might be called world politics yet during that time Europe and small portions of the Near East and North Africa strategically vital to Europe were the centres of gravity in international politics This book argues that the unipolar moment of the post Cold War era will not be replaced by a US China Cold War but rather by a long period of multipolarity in the twenty first century Examining the policy goals and possible military political strategies of several powers this study explains how Washington may play a key role in eastern Eurasian affairs if it can learn to operate in a very different political context Dale Walton also considers the rapid pace of technological change and how it will impact on great power politics Considering India China the US Russia Japan and other countries as part of a multipolar system he addresses the central questions that will drive US policy in the coming decades

Geopolitics and the Great Powers in the 21st Century will be of interest to students of international security military history

geopolitics and international relations      **Horror Film and Affect** Xavier Aldana Reyes, 2016-02-12 This book brings together various theoretical approaches to Horror that have received consistent academic attention since the 1990s: abjection, disgust, cognition, phenomenology, pain studies. It makes a significant contribution to the study of fictional moving images of mutilation and the ways in which human bodies are affected by those on the screen on three levels: representationally, emotionally, and somatically. Aldana Reyes reads Horror viewership as eminently carnal and seeks to articulate the need for an alternative model that understands the experience of feeling under corporeal threat as the genre's main descriptor. Using recent post-millennial examples throughout the book, it also offers case studies of key films such as *Hostel*, *REC*, *Martyrs*, or *Ginger Snaps* and considers contemporary Horror strands such as found footage or 3D Horror.
