Belief, Bounty, and Beauty Albertina Nugteren, 2018-08-14 This study is focused on the interaction of material and symbolic values in the domain of sacred trees in India By presenting samples from 3 000 years of Indian ritual practice it is shown that in many sacred geographies trees continue to connect the present with the past the material with the symbolic and the contemporary ecological with the traditionally sacred Although in India religion may have become very much a temple cult its embeddedness in the natural world enhances today s green interpretation of religious traditions That in environmental matters such religious inspiration may be both successful and highly ambivalent at the same time is the thought provoking position taken in the final chapters Handbook of Asian American Health Grace J. Yoo, Mai-Nhung Le, Alan Y. Oda, 2012-10-11 Asian Americans encounter a range of health issues often unknown to the American public policy makers researchers and even clinicians National research often combines Asian Americans into a single category not taking into account the differences and complexity among Asian ethnic subgroups The definition of Asian American derives from the U S Census Bureau s definition of Asian which includes peoples from all the vast territories of the Far East Southeast Asia and the South Asian Subcontinent While Census classifications determine demographic measurements that affect equal opportunity programs the broad rubric Asian American can never describe accurately the more than 50 distinct Asian American subgroups who together comprise multifaceted diversity across cultural ethnicities socio economic status languages religions and generations This volume rectifies that situation by exploring the unique needs and health concerns of particular subgroups within the Asian American community It consolidates a wide range of knowledge on various health issues impacting Asian Americans while also providing a discussion into the cultural social and structural forces impacting morbidity mortality and quality of life The volume is designed to advance the understanding of Asian American health by explaining key challenges and identifying emerging trends faced in specific ethnic groups and diseases illnesses innovative community based interventions and the future needed areas of research The Ocean of Story Somadeva Bhatta, 1928
