**Great White** James Woodford,2014-12-01 I remember thinking two things at the time Firstly if it had wanted to eat us we wouldn t have stood a chance and second it didn t want to eat us When James Woodford was confronted by half a dozen sharks swimming at full speed he froze in shock But he was even more surprised when they swam right past completely ignoring him He couldn t reconcile this experience with the mindless eating machines that dominate the discussion of sharks in Australia Interviewing world renowned experts and joining research teams at Neptune Islands one of the most famous shark aggregation locations in the world and consequently one of the most dangerous dive sites James investigates these intriguing creatures at close range and discovers their fascinating world

**Real Dirt** James Woodford,2008-09-29 Real Dirt is the true story of a sea change the life that led there and what you have to do to get where you want to be When James Woodford realised the greasy pole of big city ambition was not for him he focused on rediscovering the environmentalist within and getting his family out of the city How hard could it be

The Great Barrier Reef (Revised Edition) James Woodford,2011-08-01 The real Great Barrier Reef is not just a single clown fish or a colony of branching stag horn coral It is not simply the crystal clear water cocktails and beautiful bodies of the tourist ads Nor is it just the stage for murders mishaps shipwrecks shark attacks crocodile death rolls or gropers that swallow men s heads whole and only sometimes spit them back out The real Great Barrier Reef is a living thing a 2300 kilometre long untamed organism made up of trillions of animals It is the magnificent and terrifying home to the wild things of nightmares and hallucinations James Woodford wanted to understand the real reef in all its complexity and along its entire extraordinary length For a year he worked and dived with marine biologists exploring it from the coral outpost of Lord Howe Island in the south to the crocodile haunted waters at the reef s northern boundary in Cape York The Great Barrier Reef is a thrilling study of the reef of its beauty mystery and terror as it faces its greatest threat rising sea temperatures that stem from global warming Part science part history part travel and wholly adventurous Woodford s book is as captivating grand and magical as the reef itself

*Vanished* Sadiya Qureshi,2025-06-05 A vital and important book David Olusoga From an award winning historian of race science and empire a path breaking and poignant history of extinction as a scientific idea an imperial legacy and a political choice Anyone alive today is among a tiny fraction of the once living over 90% of species that ever existed are now extinct How did we come to think of ourselves as survivors in a world where species can vanish forever or as capable of pushing our planet to the verge of a sixth mass extinction Extinction Sadiya Qureshi shows us is a

surprisingly modern concept and a phenomenon that's not as natural as we might think. In Europe until the late eighteenth century, species were considered perfect and unchanging creations of God. Then, in the age of revolutions, scientists gathered enough fossil evidence to determine that mammoth bones, for example, were not just large elephants but a lost species that once roamed the Earth alongside ancient humans. Extinction went from being regarded as theologically dangerous to pervasive and even inevitable. Yet *Vanished* shows us that extinction is more than a scientific idea; it's a political choice that has led to devastating consequences. Europeans and Americans quickly used the notion that extinction was a natural process to justify persecution and genocide, predicting that nations from Newfoundland's Beothuk to Aboriginal Australians were doomed to die out from imperial expansion. Exploring the tangled and unnatural histories of extinction and empire, *Vanished* weaves together pioneering original research and breath-taking storytelling to show us extinction is both an evolutionary process and a human act, one which illuminates our past and may alter our future.
