Intelligent Spaces Alan Steventon, Steve Wright, 2010-05-30 This book sets out a vision ofpervasive IT through intelligent spaces and describes some ofthe progress that has been made towards its realisation. The context for intelligent spaces or iSpaces is the world where information and communication technology ICT disappears as it becomes embedded into physical objects and the spaces in which we live and work The ultimate vision is that this embedded technology provides us with intelligent and contextually relevant support augmenting our lives and our experience of the physical world in a benign and non intrusive manner. The enormous advances in hardware system design and software that are being achieved enable this vision. In particular the performance advances and cost reductions in hardware components processors memory storage and communications are making it possible to embed intelligence and communications ability into lower cost objects. The Internet is a living experiment in building complex distributed systems on aglobal scale In software there have been solid advances in creating systems that can deal with complexities on the scale required to interact with human activity in limited domains at least. The ultimate vision is challenging and there are many obstacles to its realisation.

and Identity in the Contemporary Novel Madelena Gonzalez, 2009-12-14 Contemporary aesthetics is characterized by generic mixing on the level of both form and content The barriers between different media and different genres have been broken down in all literary art forms whether it be theatre poetry or the novel While the publishing industry is increasingly keen to label novels according to genre or sub genre Chick Lit Lad Lit Gay fiction Scottish fiction New Historical Fiction Crime fiction Post 9 11 Fiction the novel itself and novelists persist in resisting generic categorizations as well as inviting them Is this a move towards a new artistic liberty or does it simply testify to a confusion of identity The aesthetic supermarket evoked by Lodge in 1992 does indeed seem to sum up the variety of choices open to writers of fiction today and a literary landscape characterized by crossover and hybridization The familiar dialectic of realism versus experimentation has sequed into a middle ground of consensus which is neither radical nor populist but both at the same time. The techniques of postmodernism have become selling points for novels and the Postmodern Condition itself seems little more than a narrative posture marketed for an increasingly wide audience Whether they have recourse to a repertoire of imposture Amis Self Winterson as Richard Bradford would have it The Novel Now 2007 in other words the abandonment of any obligation to explain or justify their excursions from credulity and mimesis or like the New Puritans make use of narrative minimalism in order to foreground their own peculiarities contemporary novelists consistently draw attention to the fundamental instability of narrative process and genre The much feared apocalypse of the novel has failed to take place with the arrival of the new millennium but generic game playing and flickering narrative hesitation and uncertainty continue to pose the question of what constitutes a novel today and to challenge its identity in a world where all culture is increasingly public increasingly contested and increasingly multifarious Thanks to theoretical approaches as well as analyses of specific works this collection of essays aims to examine the concepts of generic instability and cross fertilization of narrative postures and impostures and their constant redefinition of identity which contaminates the very concept of genre It demonstrates the diversity of generic practices in the novel today and furnishes us with undeniable evidence of how generic instability is fundamentally constitutive of the contemporary novel s identity SF Boxed Set: 140+ Intergalactic Action Adventures, Dystopian Novels & Lost World Classics Jules Verne, Mark Twain, Robert Louis Stevenson, Edgar Allan Poe, William Hope Hodgson, George MacDonald, Percy Greg, Jack London, Arthur Conan Doyle, Ernest Bramah, Jonathan Swift, Cleveland Moffett, William Morris, Anthony Trollope, Richard Jefferies, Samuel Butler, David Lindsay, Edward Everett Hale, Edward Bellamy, Charlotte Perkins Gilman, Edgar Wallace, Francis Bacon, Robert Cromie, Abraham Merritt, Ignatius Donnelly, Owen Gregory, H.
