Thoughtless: Think Less, Be More William Sharkey,2014-05

We as humans experience much stress and suffering yet we aren't really sure why this is so. We guess that our stress and suffering comes from a lack of money security loving relationships a difficult childhood lack of religious faith because we suffer from depression or some other sort of chemical deficiency in the brain or a variety of other reasons. But there is another explanation. We suffer because we think too much. We have stress because we are too attached to our thought. *Thoughtless* will show you why thoughts are the reason behind the stress and suffering that is common to almost all humans and how to do something about it how to end it. William illustrates how it is possible to allow joy and inner peace to fill your experience of life by becoming thoughtless.

Mind As Action James V. Wertsch,1998-01-08 Contemporary social problems typically involve many complex interrelated dimensions psychological cultural and institutional among others. But today the social sciences have fragmented into isolated disciplines lacking a common language and analyses of social problems have polarized into approaches that focus on an individual's mental functioning over social settings or vice versa. In *Mind as Action*

James V Wertsch argues that current approaches to social issues have been blinded by the narrow confines of increasing specialization in the social sciences In response to this conceptual blindness he proposes a method of sociocultural analysis that connects the various perspectives of the social sciences in an integrated nonreductive fashion Wertsch maintains that we can use mediated action which he defines as the irreducible tension between active agents and cultural tools as a productive method of explicating the complicated relationships between human action and its manifold cultural institutional and historical contexts Drawing on the ideas of Lev Vygotsky Mikhail Bakhtin and Kenneth Burke as well as research from various fields this book traces the implications of mediated action for a sociocultural analysis of the mind as well as for some of today s most pressing social issues Wertsch s investigation of forms of mediated action such as stereotypes and historical narratives provide valuable new insights into issues such as the mastery appropriation and resistance of culture By providing an analytic unit that has the possibility of operating at the crossroads of various disciplines *Mind as Action* will be important reading for academics students and researchers in psychology linguistics cognitive science sociology literary analysis and philosophy
