Kelly bettor's wealth tends to be much larger than those with essentially different strategies. So most of the time the Kelly bettor will have much more wealth than these other bettors but the Kelly strategy can lead to considerable losses a small percent of the time. There are ways to reduce this risk at the cost of lower expected final wealth using fractional Kelly strategies that blend the Kelly suggested wager with cash. The various classic reprinted papers and the new ones written specifically for this volume cover various aspects of the theory and practice of dynamic investing. Good and bad properties are discussed as are fixed mix and volatility induced growth strategies. The relationships with utility theory and the use of these ideas by great investors are featured.
