Andrew Collins,2018-05-15 New evidence showing that the earliest origins of human culture religion and technology derive from the lost world of the Denisovans Explains how G bekli Tepe and the Giza pyramids are aligned with the constellation of Cygnus and show evidence of enhanced sound acoustic technology Traces the origins of G bekli Tepe and the Giza pyramids to the Denisovans a previously unknown human population remembered in myth as a race of giants Shows how the ancient belief in Cygnus as the origin point for the human soul is as much as 45 000 years old and originally came from southern Siberia Built at the end of the last ice age around 9600 BCE G bekli Tepe in southeast Turkey was designed to align with the constellation of the celestial swan Cygnus a fact confirmed by the discovery at the site of a tiny bone plaque carved with the three key stars of Cygnus Remarkably the three main pyramids at Giza in Egypt including the Great Pyramid align with the same three stars But where did this ancient veneration of Cygnus come from Showing that Cygnus was once seen as a portal to the sky world Andrew Collins reveals how at both sites the attention toward this star group is linked with sound acoustics and the use of musical intervals discovered thousands of years later by the Greek mathematician Pythagoras Collins traces these ideas as well as early advances in human technology and cosmology back to the Altai Baikal region of Russian Siberia where the cult of the swan flourished as much as 20 000 years ago He shows how these concepts including a complex numeric system based on long term eclipse cycles are derived from an extinct human population known as the Denisovans Not only were they of exceptional size the ancient giants of myth but archaeological discoveries show that this previously unrecognized human population achieved an advanced level of culture including the use of high speed drilling techniques and the creation of musical instruments The author explains how the stars of Cygnus coincided with the turning point of the heavens at the moment the Denisovan legacy was handed to the first human societies in southern Siberia 45 000 years ago catalyzing beliefs in swan ancestry and an understanding of Cygnus as the source of cosmic creation It also led to powerful ideas involving the Milky Way s Dark Rift viewed as the Path of Souls and the sky road shamans travel to reach the sky world He explores how their sound technology and ancient cosmologies were carried into the West flowering first at G bekli Tepe and then later in Egypt s Nile Valley Collins shows how the ancient belief in Cygnus as the source of creation can also be found in many other cultures around the world further confirming the role played by the Denisovan legacy in the genesis of human civilization **Church of Birds** Ben H. Gagnon,2023-03-31 As humanity steadily decimates the global bird population scientists and scholars are discovering that birds may have played a greater role in shaping human evolution than primates Our distant ancestors imitated birdsong to develop language and followed bird migration flyways around the world consistently settling in prime bird habitat Church of Birds is an eco history of human evolution that s supported by recent scientific discoveries ancient myth and sacred texts Across dozens of cultures migratory birds were seen as divine agents of a benevolent sun delivering seeds to the landscape in spring and guiding souls to a heavenly paradise in the fall These mythic

roles were ultimately incorporated into Judaism Christianity and Islam **Re-orienting Modernism in Arabic and Persian Poetry** Levi Thompson,2022-12-08 Comparatively studies through both form and content the development of Arabic and Persian modernist poetry during the mid twentieth century *The Nature of Spring* Jim Crumley,2023-02-28 Third in the Wainwright Prize listed Seasons Tetralogy Spring marks the genesis of nature s year As Earth s northern hemisphere tilts ever more towards the life giving sun the icy dark days of winter gradually yield to the new season s intensifying light and warmth Nature responds For our flora and fauna for the very land itself this is the time of rebirth and rejuvenation although as Jim Crumley attests spring in the Northlands is no Wordsworthian idyll Climate chaos and its attendant unpredictable weather brings high drama to the lives of the animals he observes the badgers seals and foxes the seabirds and the raptors But there is also a wild elemental beauty to the highlands and islands a sense of nature in animation during this the most transformative of seasons Jim chronicles it all the wonder the tumult the spectacle of spring *Birds of Taiwan* Mark Brazil,2011-07-30 This is the first single volume guide ever devoted to the eastern Asian avifauna The eastern Asian region centering especially on the major islands off the continental coast including Japan and Taiwan and the immediately adjacent areas of the Asian continent from Kamchatka in the north and including the Korean Peninsula are an important centre of endemism Birds endemic to this region include representatives of many of the major families from the world s largest eagle Steller s Sea Eagle to the tiny Taiwan Firecrest The east Asian continental coast and the offshore islands also form one of the world s major international bird migration routes especially for waterfowl shorebirds and raptors while the east Asian continental mainland itself is home to a wide range of species little known to western ornithologists such as Scaly sided Merganser Oriental Stork and Mugimaki Flycatcher The guide features the most up to date text available which in conjunction with extensive colour plates throughout facilitates the field identification of all of the species known from the region Colour distribution maps enhance the text by providing a visual analysis of the summer winter and migratory ranges of all species *Birds* ,1984 **Bewick's Swan** Eileen Rees,2010-01-29 A fascinating and highly readable monograph showcasing one of the flagship species of wetland conservation in Britain to superb effect The arrival of thousands of Bewick s Swans from their Arctic breeding grounds to lakes and wetlands throughout northern and eastern Britain is an unforgettable sight Popular among both birders and the wider public these elegant birds are among the best studied waterfowl in the world Beginning with the work of the late Sir Peter Scott in the 1950s Britain s Bewick s have been the subject of intensive behavioural study while their population ecology has provided a similar focus for research In Bewick s Swan Eileen Rees tells the story of these birds in rich detail Rees discusses their biology in full with sections on population and distribution breeding biology wintering behaviour food and feeding ecology taxonomy and phylogeny migration and conservation much original research is included and there is frequent reference to the Bewick s sibling subspecies the Tundra Swan of North America Personal recollections from a lifetime of study weave through the narrative which is

illuminated by Dafila Scott's evocative illustrations
