Social Innovations in the Urban Context Taco Brandsen, Sandro Cattacin, Adalbert Evers, Annette Zimmer, 2016-04-05 This book addresses the practice of social innovation which is currently very much in the public eye New ideas and approaches are needed to tackle the severe and wicked problems with which contemporary societies are struggling Especially in times of economic crisis social innovation is regarded as one of the crucial elements needed to move forward Our knowledge of its dynamics has significantly progressed thanks to an abundance of studies on social innovation both general and sector specific However despite the valuable research conducted over the past years the systematic analysis of social innovation is still contested and incomplete The questions asked in the book will be the following 1 What is the nature of social innovations 2 What patterns can be identified in social innovations emerging at the local level 3 How is the emergence and spread of social innovations related to urban governance More precisely which conditions and arrangements facilitate and hinder social innovation We explore these questions using different types of data and methods and studying different contexts In particular we focus on innovations that aim at solving problems of the young unemployed single parents and migrants This analysis is based on original research carried out in the period 2010-2013 in the framework of a European project with a specific empirical

research strategy Research was carried out in 20 cities in 10 different European countries

Social Enterprise in Central and Eastern Europe Jacques Defourny, Marthe Nyssens, 2021-02-26 In the last two decades the quest for a widely accepted definition of social enterprise has been a central issue in a great number of publications The main objective of the ICSEM Project on which this book is based was to show that the social enterprise field would benefit much more from linking conceptualisation efforts to the huge diversity of social enterprises than from an additional and ambitious attempt at providing an encompassing definition Starting from a hypothesis that could be termed the impossibility of a unified definition the ICSEM research strategy relied on bottom up approaches to capture the social enterprise phenomenon in its local and national contexts This strategy made it possible to take into account and give legitimacy to locally embedded approaches while simultaneously allowing for the identification of major social enterprise models to delineate the field on common grounds at the international level Social Enterprise in Central and Eastern Europe the last volume in a series of four ICSEM based books on social enterprise worldwide will serve as a key reference and resource for teachers researchers students experts policy makers journalists and others who want to acquire a broad understanding of the social enterprise and social entrepreneurship phenomena as they emerge and develop in this region

Co-Production and Public Service Management Victor Pestoff, 2018-10-03 This volume compiles a dozen essays by one of the most prolific proponents of co production as a solution for many of the challenges facing public services and democratic governance at the outset of the 21st Century Co production is considered a partnership between citizens and public service providers that is essential for meeting a growing number of social challenges since neither the government nor citizens can solve them on their own These challenges include among other things improving the efficiency and effectiveness of public services in times of financial strain increasing the legitimacy of the public sector after decades of questioning its ability with the spread of New Public Management promoting social integration and cultural pluralism in increasingly diverse societies when millions of refugees and immigrants are on the move tackling the threat of burgeoning populism following the rise of anti immigrant and anti global parties in many countries in recent years and finally finding viable solutions for meeting the growing needs of aging populations in many parts of the world This volume addresses issues related to the successful development and implementation of a policy shift toward greater citizen participation in the design and delivery of the services they depend on in their daily lives and greater citizen involvement in resolving these tenacious problems facilitated by the active support of governments across the globe

Moreover it explores participatory public service management that empowers the front line staff providing public services Together with users citizens they can insure the democratic governance of public service provision

Innovation in Social Welfare and Human Services Rolf Rønning, Marcus Knutagard, 2015-02-11 Innovation is an oft heard buzzword in both public and private sectors concerned with the organisation and delivery of services to vulnerable individuals This thoughtful volume explores what innovation might actually involve in the context of contemporary human services Highlighting both the importance and utility of innovation but also promoting a more reflective approach the book distinguishes between innovation and improvement and discusses the relevant differences between private sector public sector and non profit organisations It looks at how innovation is often as much a result of the power relations between the involved actors and the structural context as a result of popularly identified drivers and barriers Including numerous case studies the book illustrates

and explains innovations in welfare services at different levels looking at the macro level innovations in social policy the meso level innovation at organisational level and the micro level user driven innovations Arguing the innovation is nothing new in human services the authors emphasise the importance of innovation being developed and supported by those working within those organisations New and creative solutions to problems encountered in everyday work by front line workers can be taken up to improve services provided and make a difference for the users rather than change being externally imposed upon them by those without insider knowledge Innovation in Social Welfare and Human Services is an important read for researchers and practitioners interested in the administration leadership and organisation of social services
