Deconstructing Ethnography Graham Button, Andy Crabtree, Mark Rouncefield, Peter Tolmie, 2015-10-15 This book aims to deconstruct ethnography to alert systems designers and other stakeholders to the issues presented by new approaches that move beyond the studies of work and work practice within the social sciences in particular anthropology and sociology The theoretical and methodological apparatus of the social sciences distort the social and cultural world as lived in and understood by ordinary members whose common sense understandings shape the actual milieu into which systems are placed and used In *Deconstructing Ethnography* the authors show how new calls are returning systems design to old and problematic ways of understanding the social They argue that systems design can be appropriately grounded in the social through the ordinary methods that members use to order their actions and interactions This work is written for post graduate students and researchers alike as well as design practitioners who have an interest in bringing the social to bear on design in a systematic rather than a piecemeal way This is not a how to book but instead elaborates the foundations upon which the social can be systematically built into the design of ubiquitous and interactive systems

Ethnomethodology, Conversation Analysis and Constructive Analysis Graham Button, Michael Lynch, Wes Sharrock, 2022-09-23. This book revisits the arguments by which Harvey Sacks and Harold Garfinkel opposed the widespread attempt in the social sciences to construct disciplinary theories and methods in place of common sense knowledge of human action and proposed instead an alternative that would investigate the organised methods of natural language use and common sense reasoning that constitute social orders. Arguments that led to the establishment and proliferation of ethnomethodology and conversation analysis. As the very constructive analysis that they opposed has begun to be incorporated into influential lines of research in ethnomethodology and conversation analysis, the authors return to the founding insights of the field and reiterate the importance of Garfinkel and Sacks' original and controversial proposals for an alternate sociology of practical action and practical reasoning. Showing how constructive analysis has become entrenched in ethnomethodology and conversation analysis and arguing for a need to reboot these approaches, this volume constitutes a call for a renewal of the radical alternative proposed by Garfinkel and Sacks. [Ethnomethodology at Work](#) Peter Tolmie, 2016-04-22.

Bringing together one of the most important bodies of research into people's working practices, this volume outlines the specific character of the ethnomethodological approach to work, providing an introduction to the key conceptual resources ethnomethodology has drawn upon in its studies and a set of substantive chapters that examine how people work from a foundational perspective. With contributions from leading experts in the field, including Graham Button, John Hughes, and Wes Sharrock, *Ethnomethodology at Work* explores the contribution that ethnomethodological studies continue to make to our understanding of the ways in which people actually accomplish work from day to day. As such, it will appeal not only to those working in the areas of ethnomethodology and conversation analysis but also to those with interests in the sociology of work and organisations. **Ethnomethodology at Work** Peter Tolmie, 2016-04-22. objectivity and self other Doing Design Ethnography Andrew Crabtree, Mark Rouncefield, Peter Tolmie, 2012-03-05
Ethnography is now a fundamental feature of design practice taught in universities worldwide and practiced widely in commerce. Despite its rise to prominence, a great many competing perspectives exist and there are few practical texts to support the development of competence. Doing Design Ethnography elaborates the ethnomethodological perspective on ethnography, a distinctive approach that provides canonical studies of work in and for design. It provides an extensive treatment of the approach with a particular slant on providing a pedagogical text that will support the development of competence for students, career researchers, and design practitioners. It is organised around a complementary series of self-contained chapters, each of which address key features of doing the job of ethnography for purposes of system design. The book will be of broad appeal to students and practitioners in HCI, CSCW, and software engineering, providing valuable insights as to how to conduct ethnography and relate it to design. **New Directions in Educational Ethnography** Akashi Kaul, William Rodick, 2016-12-22. The primary objective of *Studies in Educational Ethnography* is to present original research monographs based on ethnographic perspectives and methodologies.
