Types of stores: High activity retailing such as mass merchandising, discount stores, hardware, video, fast food, grocery service establishments and sale of bulk or large objects such as appliances or furniture. A destination store that doesn't require lighting to draw customers inside, and that offers inexpensive products and/or significant value for money. Self-service.

Lighting Strategies

- Exposed sources are effective to project a "discount" or "speedy service" image. Fluorescent sources provide the best value, giving good color rendering, high efficiency lighting with the longest life.
- Use light colored finishes on all wall surfaces to increase overall brightness and reflected light.
- For a greater sense of brightness and consistency with daylight use "841" color lamps. This stands for a Color Rendering Index of 80+ and a Correlated Color Temperature of 4100K.
- Consider neon or colored lights for window displays or to identify departments.

Lighting Levels

50-80 footcandles ambient lighting.
