Reading Comprehension Find the missing word or phrase that best completes each of the sentences below. Write your answers in the blanks.

To define a (1) _____, geographers must make generalizations about what the typical weather is like over many years in a location. World climate zones are generally divided into five larger groups: (2) _____, (3) _____, (4) _____, (5) _____, and (6) _____. These groups are divided into smaller regions. The (7) _____ region has little variation in temperature over the year; it is always hot, with an average temperature of 20°C.

The (8) _____ region does receive precipitation, just not very much: about 18 inches per year. Summers are hot and winters are cold. (9) _____ is categorized according to the amount of rainfall, rather than by landform, and can be hot or cold. This region receives less than ten inches of rain per year. The (10) _____ region has summers that are dry and hot, and winters that are cool and rainy. The (11) _____ region is located close to the ocean and is frequently cloudy, foggy, and damp. The (12) _____ region has long periods of summer heat and humidity. Winters are mild to cool. The southern United States and large areas of China are examples. A great variety in temperature and precipitation characterize the (13) _____ region, which is found in the mid-latitude interiors of Northern Hemisphere continents. The (14) _____ region consists of flat, treeless lands that form a ring around the Arctic Ocean. The (15) _____ region has snow and ice and permanently freezing temperatures. In fact, this region is so cold that it rarely snows. The climate of the (16) _____ region varies with latitude, altitude, other topography, and continental location. In this region, climates can differ based on such factors as whether a mountain slope faces north or south, and whether it is exposed to winds carrying moisture.
