**Words and Distinctions for the Common Good** Gabriel Abend, 2023-07-25 How social scientists' disagreements about their key words and distinctions have been misconceived and what to do about it Social scientists do research on a variety of topics: gender, capitalism, populism, and race and ethnicity among others They make descriptive and explanatory claims about empathy, intelligence, neoliberalism, and power They advise policymakers on diversity, digitalization, work, and religion And yet

as Gabriel Abend points out in this provocative book they can't agree on what these things are and how to identify them. How to tell if something is a religion or a cult or a sect. What is empathy? What makes this society a capitalist one? Disputes of this sort arise again and again in the social sciences. Abend argues that these disagreements have been doubly misconceived. First, they conflate two questions: how a social science community should use its most important words and what distinctions it should accept and work with. Second, there's no fact of the matter about either. Instead, they're practical reason questions for a community which aims at epistemically and morally good outcomes. Abend calls on social science communities to work together on their words, distinctions, and classifications. They must make collective decisions about the uses of words, the acceptability of distinctions, and the criteria for assessing both. These decisions aren't up to individual scholars; the community gets the last word. According to Abend, the common good, justice, and equality should play a significant role in the logic of scientific research.

Gabriel Abend is professor of sociology at University of Lucerne and the author of *The Moral Background: An Inquiry into the History of Business Ethics* (Princeton, NJ: Princeton University Press, 2012). **Science in Your World: Teacher resource masters** by Jay K. Hackett, 1991. *Ate Science Plus 2002* by LV Red Holt Rinehart & Winston, 2001-02. Publish and Prosper by Nathaniel M. Lambert, 2013-09-05. Intended to help readers succeed in academia by increasing their scholarly productivity, this book provides strategies for getting articles published quickly in reputable research journals. Rather than focusing on the basics of writing about results, this unique guidebook provides tips on how to approach research, maintain motivation, maximize productivity, and overcome common pitfalls so as to become productive scholars. The strategies reviewed will help readers successfully navigate through graduate school, get a good job, receive grants and promotions, and make important contributions to their field. Written in a breezy style, this book offers case studies, examples, and personal experiences that illustrate the themes of the chapters. Introductions and summaries and key points help to highlight the most critical concepts reviewed in each chapter. Chapter exercises encourage self-reflection and/or the application of the strategies introduced in that chapter. Self-assessment questions in Appendix A help readers pinpoint their strengths and weaknesses. A tracking chart, referred to throughout, provides an effective way to follow the progress of several manuscripts that are at different stages. An interactive version of the chart is available at [www.papstrategies.com](http://www.papstrategies.com) along with the time diary and the chapter and self-assessment exercises. Although a young scholar, Nathaniel Lambert has an impressive track record. He already has over 50 papers published in research journals. This book reviews winning strategies practiced by the author and additional insights based on conversations with top-producing scholars. By diligently applying this book's core strategies, you too can publish and prosper. Part 1 describes issues related to prioritizing one's research, such as the importance of selecting the right topic and how to use goals and deadlines to enhance motivation. Tips for enhancing efficiency are provided in Part 2, including how to improve writing efficiency, juggle several projects simultaneously, reduce wasting time, and select the best collaborators. Part 3 explores productivity pitfalls and how to avoid them. Tips on how to avoid burnout and distractions and handle rejection are

explored Part 4 provides unique tips to apply at various stages of one's academic career undergraduate graduate and professional Practical appendices provide an opportunity to determine one's strengths and weaknesses keep track of projects and expand one's knowledge using the recommended reading list Intended as a reference for students who are planning to attend graduate school and or pursue an academic career this book is ideal for professional development and or research methods courses taught in the behavioral social health and life sciences and for researchers and professionals looking to increase their publication productivity
