Ronald L Meek Book:

Classical and Marxian Political Economy Ronald L. Meek, Ian G. Bradley, Michael Charles Howard, 1982 **Classical and Marxian Political Economy** Ian C. Bradley, M.C. Howard, 1982-03-18 *Studies in the Labor Theory of Value* Ronald L. Meek, 1956 This pioneering survey of the development of the labor theory of value advances Marxian economic categories for contemporary conditions

Physiocracy and Classicism in Britain Ronald L. Meek, 1951 *The Agricultural Dilemma* Glenn Davis Stone, 2022-06-30 The Agricultural Dilemma questions everything we think we know about the current state of agriculture and how to or perhaps more importantly how not to feed a world with a growing population This book is about the three fundamental forms of agriculture Malthusian expansion industrialization external input dependent and intensification labor based The best way to understand the three agricultures and how we tend to get it wrong is to consider what drives their growth The book provides a thoughtful critical analysis that upends entrenched misconceptions such as that we are running out of land for food production and that our only hope is the development of new agricultural technologies The book contains engaging and enlightening vignettes and short histories with case studies drawn from across the globe to bring to life this important debate and dilemma The book concludes by arguing there is a viable alternative to industrial agriculture which will allow us to meet the world's needs and it ponders why such alternatives have been downplayed obscured or hidden from view This important book is essential reading for all studying and researching food production and agriculture and more broadly for all interested in ensuring we are able to feed our growing population

Marx's Capital and One Free World Tadas Horie, 1991-06-18 This book aims to clarify what the author believes to be the fallacy of the infallibility of Marx's Capital and Marxist ideology in general Other works by the author include Marxian Economics and Reality and The Critique of Dialectic Economics **Twenty-five years of objective study of the higher nervous activity (behaviour) of animals, translated from the Russian by W. H. Gantt with the collaboration of G. Volborth and an introduction by W. B. Cannon** Ivan Petrovich Pavlov, 1928 **Karl Marx and Friedrich Engels (RLE Marxism)** Cecil L. Eubanks, 2015-04-17 The project to publish the works of Marx and Engels continues and this book published in 1984 puts together a comprehensive bibliography of their works either written in or translated into English including books monographs articles chapters and doctoral dissertations together with the works of their interpreters The inclusion of the secondary literature makes this a particularly valuable bibliography and contributes greatly to the understanding of the thought of Marx and Engels

The Scottish Enlightenment Silvia Sebastiani, 2013-02-20 The Scottish Enlightenment shaped a new conception of history as a gradual and universal progress from savagery to civil society Whereas women emancipated themselves from the yoke of male masters men in turn acquired polite manners and became civilized Such a conception however presents problematic questions why were the Americans still savage Why was it that the Europeans only had completed all the stages of the historic process Could modern societies escape the destiny of earlier

empires and avoid decadence Was there a limit beyond which women's influence might result in dehumanization The Scottish Enlightenment's legacy for modernity emerges here as a two faced Janus an unresolved tension between universalism and hierarchy progress and the limits of progress Karl Marx and Friedrich Engels Cecil Eubanks,2015-04-17 The project to publish the works of Marx and Engels continues and this book published in 1984 puts together a comprehensive bibliography of their works either written in or translated into English including books monographs articles chapters and doctoral dissertations together with the works of their interpreters The inclusion of the secondary literature makes this a particularly valuable bibliography and contributes greatly to the understanding of the thought of Marx and Engels *Classical Political Economy* William O. Thweatt,2013-03-09 William O Thweatt This book is the second in three surveys of the literature in the history of economic thought in the Kluwer Recent Economic Thought series The first book covering the pre classical literature has already been published a third on the neo classical period is planned for 1988 This middle book surveys the writings on classical political economy for the past 30 years or roughly since the publication of Joseph Schumpeter's 1954 monumental *History of Economic Analysis* Shortly after World War II the American Economic Association sponsored a *Survey of Contemporary Economics* 1949 That work covered 13 subdisciplines of economics and in 1952 a companion piece appeared in which surveys of 10 additional subdisciplines were presented As Bernard Haley editor of the second volume stated even though in the two volumes twenty three fields have been treated there remain some aspects of the subject that have not been reviewed Haley 1952 p v *Natural Law and the Origin of Political Economy* Arild Saether,2017-06-26 Samuel Pufendorf's work on natural law and political economy was extensive and has been cited by several important figures in the history of economic thought Yet his name is rarely mentioned in textbooks on the history of economic thought the history of political science or the history of philosophy In this unprecedented study Arild S ther sheds new light both on Pufendorf's own life and work as well as his influence on his contemporaries and on later scholars This book explores Pufendorf's doctrines of political economy and his work on natural law which was translated into several major European languages *Natural Law and the Origin of Political Economy* considers the influence he had on the writings on political economy of John Locke Charles Montesquieu Jean Jacques Rousseau Francis Hutcheson and Adam Smith amongst others If Smith can be called the father of modern economics this book claims that Pufendorf can be called the grandfather This volume is of great importance to those who study Pufendorf's extensive works as well as those interested in history of economic thought political economy and political philosophy Founders, Classics, Canons Peter Baehr,2017-07-05 Founders classics and canons have been vitally important in helping to frame sociology's identity Within the academy today a number of positionsfeminist postmodernist postcolonialquestion the status of tradition In *Founders Classics Canons* Peter Baehr defends the continuing importance of sociology's classics and traditions in a university education Baehr offers arguments against interpreting defending and attacking sociology's great texts and authors in terms of founders and canons He demonstrates

why in logical and historical terms discourses and traditions cannot actually be founded and why the term founder has little explanatory content Equally he takes issue with the notion of canon and argues that the analogy between the theological canon and sociological classic texts though seductive is mistaken Although he questions the uses to which the concepts of founder classic and canon have been put Baehr is not dismissive On the contrary he seeks to understand the value and meaning these concepts have for the people who employ them in the cultural battle to affirm or attack the liberal university tradition

Founders, Classics, Canons Peter R. Baehr, Three categories founders classics canons have been vitally important in helping to frame sociology's precarious identity defining the discipline's sense of its past and the implications for its current activity Today that identity is being challenged as never before Within the academy a number of positions feminist postmodernist poststructuralist postcolonial converge in questioning the status of the tradition These currents in turn reflect wider social questioning about the meaning and uses of knowledge in technologically advanced societies In *Founders Classics Canons* Peter Baehr scrutinizes the nature of this challenge He provides a model of the processes through which texts are elevated to classic status and defends the continuing importance of sociology's traditions for a university education in the social sciences The concept of classic is as Baehr notes a complex one Essentially it assumes a scale of judgment that deems certain texts as exemplary in eminence But what is the nature of this eminence Baehr analyzes various responses to this question Most notable are those that focus on the functions classics perform for the scholarly community that employs them the rhetorical force classics are said to possess and the processes of reception that result in classic status The concept of classic is often equated with two other notions founders and canon The former has a well established pedigree within the discipline but widespread usage of the latter in sociology is much more recent and polemical in tone Baehr offers arguments against these two ways of interpreting defending and attacking sociology's great texts and authors He demonstrates why in logical and historical terms discourses and traditions cannot actually be founded and why the term founder has little explanatory content Equally he takes issue with the notion of canon and argues that the analogy between the theological canon and sociological classic texts though seductive is mistaken While questioning the uses to which the concepts of founder classic and canon have been put Baehr's purpose is not dismissive On the contrary he seeks to understand the value and meaning they have for the people who employ them in the cultural battle to affirm or excoriate the liberal university tradition In examining the tactics of this battle this volume offers a model of how social theory can be critical rather than radical Peter Baehr teaches in the department of politics and sociology Lingnan University Hong Kong His previous book for Transaction *Caesar and the Fading of the Roman World* was designated an Outstanding Academic Book by Choice

The Wealth or Health of Nations Carol Johnston, 2010-10-01 Why has our society become so focused on money and at what human cost Carol Johnston explores the value assumptions of Western economic theory revealing what economists contributed and what opportunities were missed as the theory kept narrowing until only market decisions were

considered and money became the only reality She then offers a proposal to transform the focus of capitalism from wealth to community and national health

The Other Adam Smith Mike Hill, Warren Montag, 2014-10-29 *The Other Adam Smith* represents the next wave of critical thinking about the still under examined work of this paradigmatic Enlightenment thinker Not simply another book about Adam Smith it allows and even necessitates his inclusion in the realm of theory in the broadest sense Moving beyond his usual economic and moral philosophical texts Mike Hill and Warren Montag take seriously Smith s entire corpus his writing on knowledge affect sociability and government and political economy as constituting a comprehensive though highly contestable system of thought We meet not just Smith the economist but Smith the philosopher Smith the literary critic Smith the historian and Smith the anthropologist Placed in relation to key thinkers such as Hume Lord Kames Fielding Hayek Von Mises and Agamben this other Adam Smith far from being localized in the history of eighteenth century economic thought or ideas stands at the center of the most vibrant and contentious debates of the twentieth and twenty first centuries

Parallax Dominik Finkelde, Slavoj Žižek, Christoph Menke, 2021-07-15 *Parallax* or the change in the position of an object viewed along two different lines of sight and more precisely the assumption that this adjustment is not only due to a change of focus but a change in that object s ontological status has been a key philosophical concept throughout history Building upon Slavoj i ek s *The Parallax View* this volume shows how parallax is used as a figure of thought that proves how the incompatibility between the physical and the theoretical touches not only upon the ontological but also politics and aesthetics With articles written by internationally renowned philosophers such as Frank Ruda Graham Harman Paul Livingston and Zizek himself this book shows how modes of parallax remain in numerous modern theoretical disciplines such as the Marxian parallax in the critique of political economy and politics and the Hegelian parallax in the concept of the work of art while also being important to debates surrounding speculative realism and dialectical materialism Spanning philosophy parallax is then a rich and fruitful concept that can illuminate the studies of those working in epistemology ontology German Idealism political philosophy and critical theory

The Insatiability of Human Wants Regenia Gagnier, 2000-12 What is the relationship between our conception of humans as producers or creators as consumers of taste and pleasure and as creators of value Combining cultural history economics and literary criticism Regenia Gagnier s new work traces the parallel development of economic and aesthetic theory offering a shrewd reading of humans as workers and wanters born of labor and desire *The Insatiability of Human Wants* begins during a key transitional moment in aesthetic and economic theory 1871 when both disciplines underwent a turn from production to consumption models In economics an emphasis on the theory of value and the social relations between land labor and capital gave way to more individualistic models of consumerism Similarly in aesthetics theories of artistic production or creativity soon bowed to models of taste pleasure and reception Using these developments as a point of departure Gagnier deftly traces the shift in Western thought from models of production to consumption From its exploration of early market logic and Kantian thought to its look at the

aestheticization of homelessness and our own market boom The Insatiability of Human Wants invites us to contemplate alternative interpretations of economics aesthetics and history itself **Historians of Economics and Economic Thought** Steven G Medema, Warren J. Samuels, 2001-08-16 The history of economic thought has always attracted some of the brightest minds in the discipline These chroniclers of development have helped form our current views and it is no surprise that many among them have been at the forefront of new movements in the history of ideas This notable collection summarizes the work of these key historians of *Fifty Major Economists* Steven Pressman, 2002-01-08 This book is an ideal reference tool providing brief biographical data on the economists who have shaped the discipline It also includes description and analysis of the major features of their economic thought It provides balanced coverage of all the major traditions and a wide range of economists with more space being devoted to seminal theorists who opened up new horizons for economics This book features lists of the writers works guides to further reading a glossary of economic terms Also available *Fifty Major Philosophers* 0415031354 10 99 *Fifty Key Contemporary Thinkers* 0415074088
