Rossi Aldo The Architecture Of The City:

The Architecture of the City Aldo Rossi, 1984-09-13 Aldo Rossi was a practicing architect and leader of the Italian architectural movement La Tendenza and one of the most influential theorists of the twentieth century The Architecture of the City is his major work of architectural and urban theory In part a protest against functionalism and the Modern Movement in part an attempt to restore the craft of architecture to its position as the only valid object of architectural study and in part an analysis of the rules and forms of the city's construction the book has become immensely popular among architects and design students Architettura Della Città, **Aldo Rossi** Adolf Max Vogt, 1983 **The Architecture of the City** Aldo Rossi, 1982-01-01 Aldo Rossi a practicing architect and leader of the Italian architectural movement La Tendenza is also one of the most influential theorists writing today The Architecture of the City is his major work of architectural and urban theory In part a protest against functionalism and the Modern Movement in part an attempt to restore the craft of architecture to its position as the only valid object of architectural study and in part an analysis of the rules and forms of the city's construction the book has become immensely popular among architects and design students An Oppositions Book *Aldo Rossi and the Spirit of Architecture* Diane Ghirardo, 2019-01-01 This beautifully illustrated book provides a crucial new look at Aldo Rossi's built work in relationship to his writings drawings and product design and explores his contributions to the architecture in postwar Italy **A Scientific Autobiography, reissue** Aldo Rossi, 2010-01-29 A lyrical memoir by one of the major figures of postmodernist architecture with drawings of architectural projects prepared especially for the book This revealing memoir by Aldo Rossi 1937 1997 one of the most visible and controversial figures ever on the international architecture scene intermingles discussions of Rossi's architectural projects including the major literary and artistic influences on his work with his personal history Drawn from notebooks Rossi kept beginning in 1971 these ruminations and reflections range from his obsession with theater to his concept of architecture as ritual *The Identity of the Architect* Laura Iloniemi, 2019-12-23 Today there are more tools for communication than ever before yet very little in the way of reflection on how these are being used and even less on what exactly is being conveyed This issue of AD looks at how architecture is communicated from a cultural perspective Do the identities of practices or their business driven branding and promotional efforts resonate with the critical acclaim many architects seek Has slick image led media coverage sold the profession short How is it possible to convey the less visual and haptic qualities of architecture Can architects be more creative in their communication efforts making these joyous on their own terms as Le Corbusier did so memorably Is there really a need to succumb to the world of corporate marketing processes and managerial business jargon The issue explores notions of editing and curating work in an age of data deluge and discusses social media as a genuinely alternative space for communication rather than for just repurposing and regurgitating information relayed The Identity of the Architect encourages the promotion of practices as an integral extension of the very culture they hope to engender

rethinking the critical project in architecture At a time when the humanities and the sciences are threatened by irrational thought from climate denial to post truth narratives and when architecture has seemingly disavowed its critical capacity and political possibility through its commodification as an instrument of the neoliberal city McEwan offers critical strategies conceptual tools figures of thought and knowledge practices to articulate modes of thinking and acting differently within architectural criticism and practice Today knowledge is a common terrain of struggle and thought requires constant reinvention The task of architecture and critique more broadly must be to interpret the world in order to change it Consequently Analogical City proposes modes for imagining the city the subject and the world otherwise towards a more egalitarian and critical architecture of the city Ultimately the analogical city is not a fully developed theory nor is it only an intuitive poetic or purely formal practice as some critics propose McEwan argues that the analogical city is poetic and political it always refers beyond itself towards a collective and critical project of the city and yet it invites a series of formal spatial and graphic operations comprising erasure and negativity followed by substitution and remontage **The**

Redundant City Norbert Kling,2020-09-04 Dynamic processes and conflicts are at the core of the urban condition Against the background of continuous change in cities concepts and assumptions about spatial transformations have to be constantly re examined and revised Norbert Kling explores the rich body of narrative knowledge in architecture and urbanism and confronts this knowledge with an empirically grounded situational analysis of a large housing estate The outcome of this twofold research approach is the sensitising concept of the Redundant City It describes a specific form of collectively negotiated urban change *The Berlin Tenement and the City* Katharina Borsi,2025-06-23 The Berlin Tenement and the City describes the development of the Berlin tenement from 1860 to 1914 showing how it became both Berlin s standard housing type and its principal urban component the city s ubiquitous typology In contrast to earlier historical categorizations of the tenement as a rental barrack here it is described as an evolving typology that dynamically responded to the demands of the city and urban reform In this dynamic understanding of architecture the tenement is the protagonist of the actual unfolding of the city its growth and densification as well as its spatial and social differentiation Charting the evolution of the productive tenement into a morphology combining living and manufacturing and the rise of tenements increasingly differentiated according to class traces their contribution to the evolution and generalization of norms of housing and domesticity This book is essential reading for scholars students architects and urbanists interested in Berlin or the history of housing and the city **Housing and the City** Katharina Borsi,Didem Ekici,Jonathan Hale,Nick Haynes,2022-06-28

home and the city and highlights the diversity of architectural solutions in the formation of housing and its communities The collection also reveals architecture s contribution to the construction of the self and communities the individual and the collective as both urban spatial entities and socio political concepts Housing and the City provides essential reading for students academics and practitioners interested in the history theory or current design of housing At a time when cities are witnessing new ways of working changing social demographics increased geographical mobility and mass migrations as well as the pervasive threat of the climate crisis all trends exacerbated by the Covid 19 pandemic Housing and the City presents a historical and theoretical reflection on the question what does it mean to be at home in the city in the twenty first century
