Comparative Area Studies Ariel I. Ahram, Patrick Köllner, Rudra Sil, 2018-01-03 In the post World War II era the emergence of area studies marked a signal development in the social sciences As the social sciences evolved methodologically however many dismissed area studies as favoring narrow description over general theory Still area studies continues to play a key if unacknowledged role in bringing new data new theories and valuable policy relevant insights to social sciences In Comparative Area Studies three leading figures in the field have gathered an international group of scholars in a volume that promises to be a landmark in a resurgent field The book upholds two basic convictions that intensive regional research remains indispensable to the social sciences and that this research needs to employ comparative referents from other regions to demonstrate its broader relevance Comparative Area Studies CAS combines the context specific insights from traditional area studies and the logic of cross and inter regional empirical research This first book devoted to CAS explores methodological rationales and illustrative applications to demonstrate how area based expertise can be fruitfully integrated with cutting edge comparative analytical frameworks

The Fluctuating Sea Saygin Salgirli, 2021-08-12 This volume fluctuates between conceptualizations of movement either movements that buildings in the medieval Mediterranean facilitated or the movements of the users and audiences of architecture From medieval Anatolia to Southern France and the Genoese colony of Pera across Constantinople The Fluctuating Sea investigates how the relationship between movement and the experiences of a multiplicity of users with different social backgrounds can provide a new perspective on architectural history The book acknowledges the shared characteristics of medieval Mediterranean architecture but it also argues that for the majority of people inhabiting the fragmented microecologies of the Mediterranean architecture was a highly localized phenomenon It is the connectivity of such localized experiences that The Fluctuating Sea uncovers The Fluctuating Sea is a valuable source for students and scholars of the medieval Mediterranean and architectural history

Innovations for Land Management, Governance, and Land Rights for

Sustainable Urban Transitions Ahmed M. Soliman, Ramin Keivani, 2024-07-27 The transformation of the built environment during the last few decades has placed enormous demands for land. About 7.7 billion people live on the planet which is expected to increase by 2.53 billion in just 30 years with the highest growth projected to be in less developed regions. The spreading of urban informality in cities of the Global South leads to chaotic informal economies and an inability to capitalize on urban economies of scale and exchange. The combination of socioeconomic and climate change vulnerability in urban centres is having a double impact on already poverty stricken and marginalized groups especially women, racialized and ethnic minority groups leading to what has come to be known as climate injustice. Land constitutes a main component of urban development and is the main asset for informal urban communities in the Middle East region. The State and urban planners can aim to regulate the growth of informal land markets or represent the interests of the citizens. However, in reality, the increasing retreat or absence of the public authorities, the crisis of confidence between the governed and governing and the deficit of urban policies to address the multitude of generated challenges cannot be concealed. This volume examines three main themes: land management and governance in the era of sustainability; legal informal and illegal land tenures and the broader socioeconomic changes impacting land and housing delivery. It investigates the correlations, transitions and interactions between the various forces and multi stakeholders that control and adjust the land delivery system for low income groups and the urban poor. This includes exploring mechanisms for correcting urban inequalities between central and peripheral quarters and the modes of shared governance. Finally, the volume also discusses developing national land policies based on legal instruments that connect the implementation of the SDGs, land and tenure security as critical drivers for more sustainable land delivery realization.

The New Spirit of Islamism Ezgi Basaran, 2024-05-02 This book explains the aspirations and concerns of Islamist actors in the aftermath of the Arab Uprisings by looking at two sets of relationships between Turkey's ruling AKP and the Egyptian Muslim Brotherhood and the AKP and Tunisia's Ennahda. It presents a unique analysis of the interplay between the AKP, Ennahda and the Muslim Brotherhood, characterizing the actors, the structure and the main features of the relationship and thereby illuminating a political confluence among these three critical Islamist entities in the aftermath of the Arab Uprisings. Existing scholarship has assumed that this relationship revolves primarily around an ideological Islamist agenda; however, this research demonstrates a more complex and nuanced situation. Ezgi Basaran puts forward that the interplay was not based on an aspiration of building an ideological Islamist bloc in the MENA region but rather revolved around the concept of political success and had a strong neoliberal ethos. Basaran draws on data collected from over 60 interviews with high level members of the AKP, Ennahda and Muslim Brotherhood to demonstrate how, in the hope of achieving success and legitimization, Ennahda and the Muslim Brotherhood have relied on the managerial prescriptions provided by the AKP. The contents of this success formula were derived from the AKP's experience as an Islamist party in power since 2002 and includes tactics on crisis evasion, legitimization, winning elections and maintaining
