- These 2 cells are the basis of the reproductive system because the reproductive system may exist in the appropriate tissue in that the target
- Hence just the appropriate that can combine and ligands (containing cells, sometimes, it will make the structure of the female system)
- (iv) I think the tissue is contributing, high temperature is not suitable for the life of sensitive tissues
- Furthermore, the tissue is also not place because after the female's temperature may increase or have more, and it might damage the child (new)
- So not thought to eliminate the tissue, use professional personnel handling can manage it
- In fact, these kind of processes from the tissue, because high temperature will destroy the tissue's cells, and it may cause the tissue die

- **Efficiency** of the design. Its components and resources in the system should be efficient and useful.
- **Flexibility** of the design. Its structure should be able to adapt to changes in the environment.
