desired CRM strategy **Marketing Management, 2nd Edition** Arun Kumar & N. Meenakshi, 2011 Marketing is a way of doing business. It is all pervasive a part of everyone's job description. Marketing is an expression of a company's character and is a responsibility that necessarily belongs to the whole company and everyone in it. Customer's New Voice John S. McKean, 2014-09-12 Find out how to reap the benefits of motivating and engaging the new direct customer voice. The Customer's New Voice shows businesses how to motivate and transform directly volunteered consumer knowledge into profitable insights enabling a new echelon of marketing relevancy, customer experience and personalization. With a deep look at the inner workings of how a modern generation of business innovators are tapping into the fresh opportunities with the customer's new voice, this book describes how businesses are transforming inference-based predictions of purchase intent with direct consumer knowledge of their actual intentions and buying context. The result: An untouchable, unprecedented level of offer relevancy, experience and personalized service levels. Those offers range from the most basic app model of "Give me your physical location, we'll find the best Thai restaurant near you and give you an instant coupon" to a more complex model such as an Electric utility value proposition: "We'll give you discounts to charge your Prius during certain times to help us optimize our grid efficiency while allowing Toyota to monitor and optimize your battery to enable Toyota's R" however this type of data has less than 10 percent accuracy. This low effectiveness also necessitates up to 70 percent of a business's cost infrastructure. Direct consumer knowledge is now available and boasts up to 20-50 percent accuracy yet businesses remain anchored in the old indirect competencies. This book helps companies integrate compelling sharing motivators and controls for consumers to feel motivated and safe about directly sharing their product and experience desires providing the ultimate market advantage. Learn how to catch up to the new digitalized consumer. Leverage direct consumer information from current megatrends. Navigate privacy's current and future metamorphosis. Unlock the untapped value of Big Data's true enabler. Little Data Parsing incidentally volunteered data has been stagnant for decades due to the capabilities and expectations of a new generation of enabled consumers. The timeless reality is that any level of investment in computing power, data and analytics will never approach their full ROI potential without interfusing the direct intentional insights from the consumer. If today's forward thinking companies want to profitably engage the new consumers, they must learn the secrets of motivating and safeguarding this new potential of customer transparency. The risks of not engaging these new consumer voices: Irrelevancy and Silence. The Customer's New Voice shows businesses how to fulfill the promise and caveat of the new consumer: "If you make my life easier, reward me and respect my shared information, I will tell you my secrets."
