Technology and Law Enforcement Robert L. Snow,2007-07-30 Although for much of the mid 20th century police departments across the U S had been reluctant to embrace new technology depending instead on traditional police techniques detectives in Los Angeles finally departed from this practice when they found themselves stymied in their attempts to solve the infamous Night Stalker serial murder case This murderer and rapist had gone on a deadly rampage during the spring and summer of 1985 and though the police used every traditional police technique they could not solve the crime Finally in desperation they decided to do something different use what was then the latest cutting edge technology This new technology the laser print finder worked perfectly and the police arrested the Night Stalker the next day Following this astonishing success police departments across the nation suddenly began clamoring to obtain all kinds of new technology to assist them in solving crimes This rush to embrace the latest technology hasn t slowed in the intervening 21 years This book takes readers through every major branch of law enforcement and shows how technology has radically changed police department operations during the last two decades It also shows how these changes continue today as technology advances and refines techniques already in practice Beginning with the Night Stalker case the author illustrates how the use and reliance on new technologies in solving crimes has made policing and detective work more accurate and efficient in capturing and convicting criminals and courts more recently in releasing innocents convicted of crimes Capitalizing on the interest in all things forensic this book illuminates the behind the scenes technologies that go into solving crimes and keeping dangerous criminals off the street Snow covers DNA and fingerprint technologies vehicle technologies undercover work bomb detection and other methods Using many real life examples and first hand anecdotes he shows how

technology has become part and parcel of criminal justice efforts to solve crimes Commission Hearings United States. National Commission for the Review of Federal and State Laws Relating to Wiretapping and Electronic Surveillance,1976

Strangers On The Street - Serial homicide in South Africa Micki Pistorius, 2012-10-03 The first comprehensive study of serial homicide in South Africa is intended primarily for psychologists students educators and police officers who require background on the behavioural patterns motives and other details about serial killers It is a serious attempt to understand the mind of the serial killer so that he may be identified and apprehended as soon as possible For as the author points out serial killers prospects of rehabilitation are negative and they need to be removed from society for the remainder of their lives Detectives need specific training to investigate serial homicide and Pistorius believes that an understanding of the psychodynamics of serial killers should be extended to state prosecutors judges parole officers and pathologists She also believes that those who work with children need to be aware that all documented cases of serial killers reveal either childhood abuse or neglect and that children displaying antisocial behaviour should be identified and receive counselling Only in being proactive in preserving the mental health and well being of children can the double tragedy of serial homicide ultimately be prevented
