Baronov,2010-05-14 Beginning with the colonial era Western biomedicine has radically transformed African medical beliefs and practices Conversely in using Western biomedicine Africans have also transformed it The African Transformation of Western Medicine and the Dynamics of Global Cultural Exchange contends that contemporary African medical systems no less biomedical than Western medicine in fact greatly enrich and expand the notion of biomedicine reframing it as a global cultural form deployed across global networks of cultural exchange The book analyzes biomedicine as a complex and dynamic sociocultural form the conceptual premises of which make it necessarily subject to ongoing change and development as it travels the globe David Baronov captures the complexities of this cultural exchange by using world systems analysis in a way that places global cultural processes on equal footing with political and economic processes In doing so he both allows the story of Africa s transformation of Western biomedicine to be told and offers new insights into the capitalist world system

"*Our Relations...the Mixed Bloods*" Larry Nesper,2021-04-01 In the Great Lakes region of the nineteenth century mixed bloods were a class of people living within changing indigenous communities As such they were considered in treaties signed between the tribal nations and the federal government Larry Nesper focuses on the implementation and long term effects of the mixed blood provision of the 1854 treaty with the Chippewa of Wisconsin That treaty not only ceded lands and created

the Ojibwe Indian reservations in the region it also entitled hundreds of mixed bloods belonging to the Chippewas of Lake Superior as they appear in this treaty to locate parcels of land in the ceded territories However quickly dispossessed of their entitlement the treaty provision effectively capitalized the first mining companies in Wisconsin initiating the period of non renewable resource extraction that changed the demography ecology and potential future for the region for both natives and non natives With the influx of Euro Americans onto these lands conflicts over belonging and difference as well as community leadership proliferated on these new reservations well into the twentieth century This book reveals the tensions between emergent racial ideology and the resilience of kinship that shaped the historical trajectory of regional tribal society to the present

The West Edward Muir, Brian P. Levack, Michael Maas, Meredith Veldman, 2006 This book explores the changing definition and identity of the West as the result of a series of encounters with different beliefs ideas technologies and peoples both outside the West and within it The text begins with an essay called What is the West that offers a framework for understanding Western civilization while showing the value and importance of cultural encounters Justice in History features make history come alive by presenting historically significant trials or episodes in which different notions of justice or injustice were debated and resolved as exemplified in Egyptian Tomb Robbers on Trial Chapter 2 and Prostitution Corporal Punishment An end of text glossary defines key concepts identified in the chapters Back cover

The Global Transformation Barry Buzan, George Lawson, 2015-02-05 The long nineteenth century 1776 1914 was a period of political economic military and cultural revolutions that re forged both domestic and international societies Neither existing international histories nor international relations texts sufficiently register the scale and impact of this global transformation yet it is the consequences of these multiple revolutions that provide the material and ideational foundations of modern international relations Global modernity reconstituted the mode of power that underpinned international order and opened a power gap between those who harnessed the revolutions of modernity and those who were denied access to them This gap dominated international relations for two centuries and is only now being closed By taking the global transformation as the starting point for international relations this book repositions the roots of the discipline and establishes a new way of both understanding and teaching the relationship between world history and international relations
