Snow and Ice-Related Hazards, Risks, and Disasters Wilfried Haeblerli, Colin Whiteman, 2021-02-12. Snow and Ice Related Hazards, Risks and Disasters, Second Edition provides you with the latest scientific developments in sea level rise, permafrost degradation, rock ice avalanches, glacier surges, glacial lake outburst floods, ice shelf collapses, climate change implications, causality, impacts, preparedness and mitigation. The book takes a geo-scientific approach to the topic while also covering current thinking about directly related social scientific issues that can affect ecosystems and global economies. Special emphasis is placed on the rapidly progressing effects from global warming on the cryosphere, perspectives for the future and latest scientific advances and technological developments. Presents the latest research on causality, glacial surges, ice shelf collapses, sea level rise, climate change implications and more. Contains numerous tables, maps, diagrams, illustrations and photographs of hazardous processes. Features new insights on the implications of climate change including increased melting, collapsing, flooding, methane emissions and sea level rise.

Ecosystem Services of Headwater Catchments Josef Křeček, Martin Haigh, Thomas Hofer, Eero Kubin, Catrin Promper, 2017-07-12. This book addresses the evaluation of environmental impacts and services identified in headwaters of different eco-zones around the world. It presents 24 papers selected from contributions to recent meetings of the European Forestry Commission Working Party on the Management of Mountain Watersheds, which is coordinated by the FAO Food and Agriculture Organization of the United Nations. Through its biennial sessions and inter-session activities, the Working Party focuses on the continuous exchange of knowledge and experience between professionals in Europe and other regions of the world confronted with similar issues. The contributions have been updated and peer-reviewed, and the interdisciplinary team of authors includes experts from the fields of geography, hydrology, chemistry, biology, forestry, ecology and socio-economics. The participatory management of headwater catchments in Europe, Africa, America and Asia was the central theme of the articles, which were divided into four sessions: 1. Headwater Environment and Natural Resources; 2. Enhancing Environmental Services in Headwaters; 3. Environmental Services in the Changing World; and 4. New Challenges for Environmental Education and Active Citizenship. The practical applications shown in the book address the multi-resource concept. The book offers a unique and valuable resource for environmentalists, engineers, watershed planners and policymakers alike.
