What is Mathematics, Really? Reuben Hersh,1997 Tries to refine the philosophy of mathematics to reflect

what mathematicians really do and argues that mathematics must be understood in a social context Concepts and Society (RLE Social Theory) Ian C. Jarvie, 2014-08-21 The main concern of Dr Jarvie's book is the relation of belief to action. He argues that people act in society because of beliefs because of the way they see things. There is the world of physical and social conditioning where fixed roles, tropisms, adaptations seem to operate; there is the world of mind where action alternatively seems to originate; but then there is Karl Popper's third world where dwell the objects of thought, ideals, theories, beliefs, values which directly affect how people act and thus affect the way the world is. Reform, change, improvement, modification all proceed from the competitive interaction between our private beliefs about the world and their third world brothers. Jarvie contends that the struggle of privately held beliefs to realize themselves in the world through the actions of their believers is a fundamental force behind social change.

Western Realism and International Relations Aswini K. Ray, 2004 This book provides an alternative perspective of International Relations from Hiroshima to 9/11. Both its diplomacy and mainstream scholarship are linked by realpolitik in a vicious circle of retrogressive symbiosis. It simultaneously undermined the UN system of collective security from its origin and the scientific credential of its scholarship. The Cold War that it spawned restricted economic prosperity, political stability and democratic freedom within its narrow core area of the United States and Europe at the cost of its vast periphery in the Third World. Its unpredicted collapse extended insecurity across the entire globalised system including its core area as events since 9/11 forcefully underscore. While the new hegemonic system has become globally more insecure for all its citizens, its scholarship is still clueless about the collapse of the bipolar system it created in the midst of the massive confidence building exercise to stabilise it; it is even less able to creatively respond to its orderly transition.
