Interventions to Reduce Logistic Costs for Trade Competitiveness and Poverty Jose Luis Guasch, 2022-03-28 Logistics are a critical element for country competitiveness and economic performance, including poverty reduction. Most emerging countries, such as Asia, Africa, Latin America, and the Caribbean, are focusing on export-led growth strategies and poverty reduction strategies, and their performance is adversely affected by their high logistic costs that range from 10% to 50% of product value. This book illustrates the relevance and impact of logistics on these areas while also offering an effective logistics and infrastructure framework that addresses the full spectrum of the productive chain: upstream, midstream, and downstream. It provides a structured agenda for designing and implementing holistic policy interventions, soft and hard components, to reduce logistic costs.
