The Wonder and the Mystery Robin Gotler, 2022-02-16 Published in association with the Annals of Family Medicine
The Wonder and the Mystery is an anthology of intimate personal stories and innovative ideas from the Annals Reflections section. It includes a wide range of articles from influential pieces on urgent topical issues to exceptional stories of unique individuals. These articles shed light on small moments and major life transitions. In the process, they help us find meaning in our own physical, emotional, and spiritual journeys. The one-of-a-kind stories and ideas in the book speak to all of us who are interested in health care and health caring and connection: clinicians, patients, family members, researchers, policy makers, and more. The book reminds us that the things we cannot measure may be the very things that will sustain us. **Subprime**

Health Nadine Ehlers, Leslie R. Hinkson, 2017-07-15 From race-based pharmaceutical prescriptions and marketing to race-targeted medical hot spotting and the Affordable Care Act to stem cell trial recruitment discourse, *Subprime Health* is a timely examination of race-based medicine as it intersects with the concept of debt. The contributors to this volume propose that race-based medicine is inextricable from debt in two key senses. They first demonstrate how the financial costs related to race-based medicine disproportionately burden minorities as well as how monetary debt and race are conditioned by broader relations of power. Second, the contributors investigate how race-based medicine is related to the concept of indebtedness and is often positioned as a way to pay back the debt that the medical establishment and society at large owes for the past and present neglect and abuses of many communities of color. By approaching the subject of race-based medicine from an interdisciplinary perspective, critical race studies, science and technology studies, public health, sociology, geography, and law, this volume moves the discussion beyond narrow and familiar debates over racial genomics and suggests fruitful new directions for future research. Contributors: Ruha Benjamin, Princeton U; Catherine Bliss, U of California, San Francisco; Khiara M. Bridges, Boston U; Shiloh Krupar, Georgetown U; Jenna M. Loyd, U of Wisconsin, Milwaukee; Anne Pollock, Georgia Tech.
