The Fog of Peace Gabrielle Rifkind, Giandomenico Picco, 2013-12-17 Institutions do not decide whom to destroy or to kill whether to make peace or war those decisions are the responsibility of individuals This book argues that the most important aspect of conflict resolution is for antagonists to understand their opponents their ambitions their pains Gabrielle Rifkind and Giandomenico Pico present two very different experiences of international relations Rifkind as a psychotherapist now immersed in the politics of the Middle East and Picco as a career diplomat with a successful record as a negotiator at the UN Developing links between psychology and politics the authors ask should we talk to the enemy What happens if the protagonists are nasty and brutish tempting policy makers to retaliate How do nations find the capacity not to hit back trapping themselves in endless cycles of violence Presenting a unique combination of psychological theories geopolitical realities and first hand peace making experience this book sheds new light on some of the worst conflicts in the modern world and demonstrates above all how empathy can often be far more persuasive than the most fearsome weapons

The Zeroes Randall Lane,2011-08-30 What Liar s Poker was to the 1980s The Zeroes is to the first decade of the new century an insider s memoir of a gilded era when Wall Street went insane and took the rest of us down with it Randall Lane never set out to become a Wall Street power broker But during the decade he calls the Zeroes he started a small magazine company that put him near the white hot center of the biggest boom in history Almost by accident a man who drove a beat up Subaru and lived in a rented walk up became the go to guy for big shots with nine figure incomes Lane s saga began with a simple idea a glossy magazine exclusively for and about traders which would treat them like rock stars and entice them to splurge on luxury goods Trader Monthly was an instant hit around the world Wall Streeters loved the spotlight and advertisers like Gulfstream Maybach and Bulgari loved the marketing opportunity To accelerate the buzz Lane s staff threw parties featuring celebrities premium steaks cigars and top shelf vodka Nothing was too expensive or too outrageous Private jets in Napa Valley Casino nights in London And 1 000 a seat boxing matches in New York where traders from Goldman Sachs and Bear Stearns pounded each other in front of tuxedoed throngs Before long Wall Street s rich and powerful trusted Lane as a fellow insider the guy who could turn an anonymous trader into a cover model and media darling And the rest of the world sought him out as a way to tap into Wall Street s riches As he emptied his bank account to help keep his little company afloat he became a nexus for the absurd Traders who turned 9 11 and Hurricane Katrina into multimillion dollar windfalls John McCain closing out the craps tables during an all night gambling binge Pop artist Peter Max hustling hundreds of thousands of dollars by selling traders paint by numbers portraits Al Gore John Travolta Moby Corrupt Caribbean rulers the mobsters from Goodfellas the pope And a retired baseball star turned market guru named Lenny Dykstra whose rise and fall was a great metaphor for the decade All played roles in Lane s increasingly surreal world When the crash of 2008 hit Lane s company and life savings were destroyed along with the high flying traders and dealmakers his magazines exalted But Lane walked away with something more lasting an incredible true story told by a skilled writer and reporter who sat squarely in the middle of one of the critical periods in modern financial and cultural history People will turn to The Zeroes for many years to come to find out what the era was really like

The Simulation Hypothesis Rizwan Virk,2025-07-22 The definitive exploration of one of the most daring and consequential theories of our time completely revised and updated to reflect the rapid advances in artificial intelligence and virtual reality Are we living in a simulation MIT computer scientist Rizwan Virk draws from research and concepts from computer science artificial intelligence video games quantum physics and ancient mystics to explain why we may be living inside a simulated reality like the Matrix Simulation theory explains some of the biggest mysteries of quantum and relativistic physics such as quantum indeterminacy parallel universes and the integral nature of the speed of light using information and computation Virk shows

how the evolution of our video games including virtual reality augmented reality artificial intelligence and quantum computing will lead us to a technological singularity We will reach the simulation point where we can develop all encompassing virtual worlds like the OASIS in Ready Player One or The Matrix and in fact we are already likely inside such a simulation While the idea sounds like science fiction many scientists engineers and professors have given the simulation hypothesis serious consideration including Elon Musk Neil deGrasse Tyson and Nick Bostrom But the simulation hypothesis is not just a modern idea Philosophers of all traditions have long contended that we are living in some kind of illusion and that there are other realities that we can access with our minds The Simulation Hypothesis is the definitive book on simulation theory and is now completely updated to reflect the latest developments in artificial intelligence and virtual reality Whether you are a computer scientist a fan of science fiction like the Matrix movies a video game enthusiast a spiritual seeker or simply a fan of mind bending thought experiments you will never look at the world the same way again
