**Innovation Management** Jan van den Ende, 2021-10-01. Not solely covering new products, Innovation Management focuses on new services and new business models. In doing so, it provides an introduction to new business development. The book follows the logic of the innovation process from idea development via selection to implementation and discusses these topics both on the level of the company and individual projects. Its content is evidence-based but with many practical examples. This textbook ensures up-to-date subject knowledge by providing a contemporary approach. Novel methodologies such as design thinking, lean innovation and open innovation are included. Exercises and discussion questions at the end of each chapter enable self-testing and reflection. Comprehension of new topics is aided by an in-margin glossary and further multimedia links on the companion website [bloomsburyonlineresources.com/innovationmanagement](http://bloomsburyonlineresources.com/innovationmanagement). It is an essential resource for undergraduate students seeking a rigorous and science-based yet accessible and manageable overview of innovation management.

**Methodologies and Technologies for Networked Enterprises** Giuseppe Anastasi, Emilio Bellini, Di Nitto Elisabetta, Carlo Ghezzi, Letizia Tanca, Eugenio Zimeo, 2012-07-30. The need for flexibility and globalization forces enterprises to decentralize their activities and continuously re-structure their networks of relationships regarding both their productive supply chains and their design and innovation processes. The goal of the ArtDeco project funded by the Italian Ministry of Education and Scientific Research under the FIRB program funding for basic research has been to address these issues by proposing solutions from three main perspectives: the organizational perspective aimed at studying how companies work in a network and how their design processes can benefit from collaboration with other companies; the informational perspective focusing on how to acquire relevant knowledge from unstructured information and processes and on how to organize and manage such knowledge; and the infrastructural perspective focusing on understanding how self-adaptive workflows and software systems can help in supporting the dynamic interconnection of enterprises. The book contains a collection of papers offering an overview of the main results produced by the ArtDeco project. It has been structured into the following four main parts: organizational issues, methodologies, empirical contexts and policies, software methodologies and technologies, knowledge elicitation and management, and management of peripheral devices. It also includes a case study used throughout the book as a reference example.
