Handbook of Research on Institutional, Economic, and Social Impacts of Globalization and Liberalization Bayar, Yilmaz, 2020-11-06 Globalization is a multi dimensional concept reflecting the increased economic social cultural and political

integration of countries There has been no pinpointed consensus on the history of globalization however the globalization process has gained significant speed as of the 1980s in combination with liberalization Many countries have removed or loosened barriers over the international flows of goods services and production factors In this context both liberalization and globalization have led to considerable institutional economic social cultural and political changes in the world The liberalization and globalization processes have affected economic units institutions cultures social lives and national and international politics The Handbook of Research on Institutional Economic and Social Impacts of Globalization and Liberalization provides a comprehensive evaluation of the institutional economic and social impacts of globalization and liberalization processes across the world While highlighting topics like economics finance business and public administration this book is ideally intended for government officials policymakers practitioners stakeholders researchers and academicians interested in the international impacts of globalization and liberalization across a variety of different domains **Teacher**

Universities and the Occult Rituals of the Corporate World explores the metaphorical parallels between corporatised market oriented universities and aspects of the occult In the process the book shows that the forms of mystery mythmaking and ritual now common in restructured institutions of higher education stem from their new power structures and procedures and the economic and sociopolitical factors that have generated them Wood argues that universities have acquired occult aspects as the beliefs and practices underpinning present day market driven academic discourse and practice weave spells of corporate potency invoking the bewildering magic of the market and the arcane mysteries of capitalism thriving on equivocation and evasion Making particular reference to South African universities the book demonstrates the ways in which apparently rational features of contemporary Western and westernised societies have acquired occult aspects It also includes discussion of higher education institutions in other countries where neoliberal economic agendas are influential such as the UK the USA the Eurozone states and Australia Providing a unique and thought provoking look at the impact of the marketisation of Higher Education this book will be essential reading for academics researchers and postgraduate students
