Critics claim that the success is overstated and that vaccines may even be dangerous. Many consider mandatory vaccinations a violation of individual rights or religious principles. Vaccine Injuries Lou Conte, Tony Lyons, 2014-11-18 Reveals the truth behind the controversial issue of vaccine related injuries Proponents declare that vaccines have saved millions of lives Critics claim that the success is overstated and that vaccines may even be dangerous Many consider mandatory vaccinations a violation of individual rights or religious principles Many in public health argue that vaccine mandates are critical and justified and that antivaccination sentiment has resulted in outbreaks of preventable childhood illnesses Vaccine critics point to mainstream medicine's denial of and underreporting of vaccine injury Vaccine injuries have happened in the past and continue to happen today and neither the mainstream medical establishment nor the government has ever fully and transparently addressed the issue of vaccine injury In the 1980s the United States addressed individual cases of vaccine injury by establishing the NVICP the National Vaccine Injury Compensation Program a controversial Department of Health and Human Services program The NVICP was intended to be non adversarial compassionate and generous to vaccine injury victims However many vaccine injury victims and safety advocates believe that the program is not functioning as intended There are also concerns that the program is keeping the reality of vaccine injury from public inspection *Vaccine Injuries* a groundbreaking book in the field reveals cases of vaccine injury from the NVICP something that has never been offered to the public and lets readers assess vaccine injuries for themselves

Profiles of the Vaccine-Injured Children's Health Defense, Robert F. Kennedy Jr., 2022-10-25 Are vaccine injuries really one in a million as governments and public health experts constantly tell us This comprehensive look at the evidence by Children's Health Defense illustrated by nine real life stories of serious vaccine injury exposes health agencies soft pedaling of vaccine risks as a dangerous lie For most people the potential risks of vaccination which include life changing illness family bankruptcy and even death are invisible and almost inconceivable until a vaccine injury happens to them Through the poignant and riveting stories of nine injured children and adults *Profiles of the Vaccine Injured* by Children's Health Defense communicates the devastating impacts of vaccine damage on health family finances relationships and more As the book's introductory chapters show vaccine injuries whether from a routine childhood injection or a travel vaccine or a COVID 19 shot are common not rare Discussing US children's poor showing in global health rankings the book assembles compelling evidence pointing to childhood vaccination as a key elephant in the room The heart of the book resides in the vaccine injury stories told by mothers of injured children and injured adults Conveying in vivid detail what it's like to live with conditions such as severe autism chronic pain and immune systems gone haywire the nine individuals also attest to the disturbing fact that when it comes to vaccine injuries there's no help legally or financially you're on your own In addition they share affecting accounts of gaslighting a lack of answers or solutions and outright hostility from the medical community social isolation heavy financial burdens and interrupted careers and lives Exposing the truth behind the vaccine safety myth *Profiles of the Vaccine Injured* makes vaccine injury personal and demonstrates that we ignore vaccine risks at our peril
