Higher international logistics costs, returning demand from industry workload and higher global metals prices are some of the ingredients to quicker building cost inflation. Whilst some EU materials exporters to the UK are adjusting to Brexit, other EU exporters, initially smaller or specialist firms, hit proportionally harder, are now deciding not to supply the UK at all because the additional red tape involved makes it not commercially viable. If this trend replicates across the whole EU to UK supply chain, visible disruption and higher prices are likely until other sources of supply begin to increase in volume and step in to address these supply issues. Among other exporters continuing to supply the UK, significant price increases are being applied to cover the permanent Brexit non tariff barriers and additional administrative processes. SPON'S ARCHITECTS AND BUILDERS PRICE BOOK 2022, compiled by AECOM, still provides the most accurate, detailed and professionally relevant construction price information for the UK. Its unique Tender Index, updated through the year 2015 100, gives an ongoing reality check and allows you to adjust for changing market conditions. Although it suits a wide range of project sizes, this is the only price book which sets out a detailed cost base for contracts exceeding 4 000 000 in value. Use the access code inside the front cover of the book to get set up with an eBook of this 2022 edition on the VitalSource Bookshelf platform, available for access and use until the end of December 2022.
